

# *GRAND VITARA*

Way of Life!

# Beyond your imagination

The new Grand Vitara is here. With more aggressive yet refined styling, new slatted front grille and bumper with chrome highlights, and a more streamlined body, the Grand Vitara is hungry for adventure. But unlike other SUV's, the Grand Vitara proves it's not just a pretty face with true 4x4 capabilities and its signature powerhouse performance that's ready to tackle any terrain. Jump in and get ready for a grand adventure.

# Go with confidence

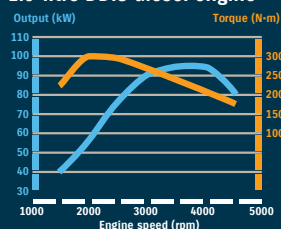

Whether you are gliding over smooth surfaces or roughing it out on a rugged terrain, the Grand Vitara's powerful engines and transmissions lets you call the shots. With reliable and sturdy performance you will have the confidence to make the most of every journey.

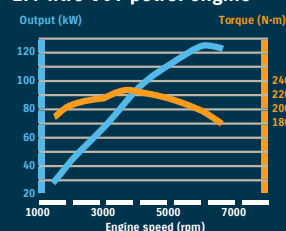

Photo: 5-door model, Bison Pearl Metallic

Suit performance to your sensibilities, with two engines and manual or automatic transmissions to choose from. Engine selection comprises 2.4-litre petrol with variable valve timing (VVT) technology, and a 1.9-litre DDiS (Direct Diesel injection by Suzuki). VVT and DDiS increase power and torque as well as fuel efficiency. Both technologies widen the performance range while reducing fuel consumption, maximising cost performance. An additional benefit of the DDiS common-rail fuel injection system is reduced harmful emissions. The variable intake system is also available in the 2.4-litre engines. This system varies the length of intake port in response to the engine speed, which realises greater torque in broader ranges of the engine speed.

**1.9-litre DDiS diesel engine**

**2.4-litre VVT petrol engine**

Increase fuel economy and sporty performance with the five-speed manual transmission. New output-reduction design enhances shift feeling and durability, with reduced vibration.

Automatic transmissions feature sporty shift-gate configurations, plus gear ratios tuned for satisfying acceleration, a smooth, quiet ride and effort-free operation.

# Expand your boundaries

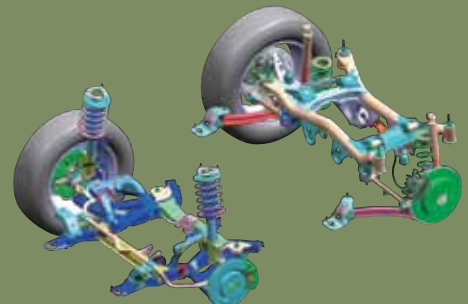

Based on Suzuki's long tradition of developing reliable 4x4s, and now 4x2's, the Grand Vitara is a powerful and versatile vehicle that offers solid on and off-road performance. Jump in and hit the highway or the terrain, there is no limit where the Grand Vitara can take you.

Photo: 5-door Sport model, Bison Pearl Metallic

## Built-in Ladder Frame

The "Built-in Ladder Frame" which integrates a ladder frame to a monocoque body increases rigidity and durability without adding to overall weight. This lightweight, one-piece body also reduces overall and floor heights, increasing cabin space despite its high ground clearance. Adding in the fully independent suspension further enhances resistance to twisting and flexing while contributing to linear handling response for smoother on-road cruising and impressive off-road traction. The bottom line for driver and passengers alike is the freedom to go where you will and the stability to enjoy every minute of it.

The fully independent suspension features front MacPherson struts and rear multi-link geometry, complementing the "Built-in Ladder Frame" and decreasing body noise while increasing on-road response and off-road handling.

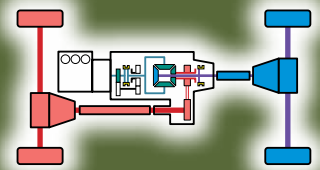

# 4-mode 4x4

The Grand Vitara's 4-mode 4x4 system transmits power to all four wheels at all times, ensuring positive traction regardless of road surface. A switch built into the centre console lets you quickly and easily change modes between **4H** for most driving conditions, **4H Lock** for serious off-roading, **4L Lock** for extreme surface conditions, and **N (neutral)** mode, specifically intended for motor home owners wishing to take along an SUV on camping trips to use as a runabout. Switching to N-mode frees the transmission for safe and effortless towing of the Grand Vitara.

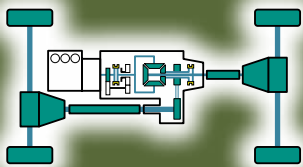

Photo: 5-door Sport model, Bison Pearl Metallic

## 4H

The ideal mode for most driving, 4H mode offers the appropriate front/rear torque split for smooth, quiet on-road performance plus impressive off-road traction.

## 4H Lock

For serious off-roading, this high-range 4x4 mode evenly distributes traction to front and rear wheels for powering through even deep snow or mud.

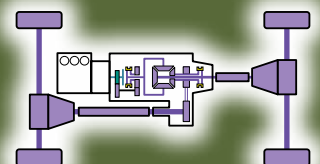

Photo: 3-door model, Platinum Pearl Metallic (ZUG)

Photo: 5-door Sport model, Bison Pearl Metallic

## 4L Lock

With a transfer gear ratio nearly twice that of 4H Lock mode at 1.970, this low-range 4x4 mode ensures enough low-end traction to get out of extremely difficult conditions.

# Grand Vitara Urban 2WD

From the makers of Australia's first and most awarded compact SUV comes the all-new Grand Vitara Urban, Suzuki's first ever 2WD SUV. Featuring refined styling, latest technologies, flexible cargo space and impressive fuel economy of just 8.7-litres per 100km, this SUV was built for the city. Despite its fuel efficiency, it still delivers a powerful performance through its 2.4-litre VVT engine and has a 1,850kg towing capacity. Strap yourselves in, the Grand Vitara Urban is ready to take on the big bad city.

Photos: Grand Vitara Urban, Bison Pearl Metallic

# Go anywhere in style

With its bold new front mask and impressive fenders, the Grand Vitara presents an appearance that is both dynamic and stylish. Tough enough for off-road driving yet elegant enough to grace the city streets, this vehicle is in itself practically an adventure in panache and reliability.

Photo: Left: 3-door, Platinum Pearl Metallic  
Right: 5-door Sport model, Bison Pearl Metallic

# A driving delight

Not only does the Grand Vitara provide you with the power and reliability to get wherever you want to, but its overall quality ensures that you get there in style. The fully automatic air conditioning system enables you to set your preferred temperature while the state-of-the-art entertainment system enhances the enjoyment of your journey.

Photo: 5-door Sport model

Cruise control switches positioned on the front of the steering wheel spoke are easy to find and easier to use.

Fully automatic air conditioning system maintains the ideal cabin ambience for increased driving enjoyment.

## High-quality audio systems

Grand Vitara's cabin design is well matched to its sporty exterior styling. The refined atmosphere encourages driver and passengers to relax, while the smart, dynamic layout implies an active, fun-loving lifestyle. All models are standard-equipped with a CD tuner with MP3 playback function, as well as steering wheel-integrated controls for easy operation. A navigation system is also available for certain models.

Availability of features shown may vary for individual markets and grades.

# Ride the rough in comfort

The cabin of the Grand Vitara offers enough “living space” to seat five in comfort. Moreover the seating arrangement is flexible and the positions can be arranged to suit the passengers and their gear. There are also enough compartments throughout the cabin for added convenience.

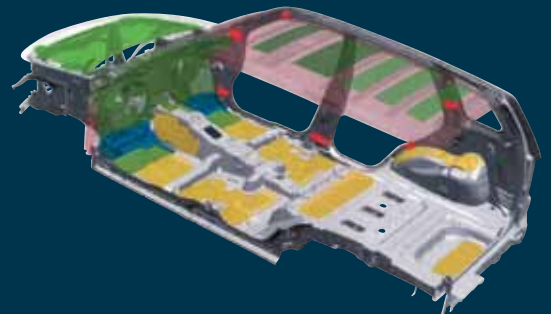

Photo: 5-door Diesel. Overseas model shown.

## Noise and vibration reduction

Noise-reducing and vibration-absorbing materials have been extensively used throughout. These measures, together with the focused chassis and body engineering and the rigid “Built-in Ladder Frame,” enhance occupant comfort and increase all-round driving pleasure under a wide variety of driving conditions.

Note: Please do not recline the front seatbacks too much when driving, as the seatbelts will not operate effectively in case of a collision or sudden stops.

The centrally located floor console provides convenient storage for maps and other essentials, and features a sliding lid/armrest for comfort\*.

\*Sliding lid/armrest available for 5-door models only.

An available sunroof enhances cabin spaciousness, while allowing all occupants to better experience and appreciate the environment they're cruising through\*.

\*Prestige model only.

60:40-split rear seats\* can be separately reclined for individual passenger comfort, or tumbled forward for more space as lifestyle needs demand.

\*50:50-split rear seats for 3-door model.

# On the move—mind at rest

When you are confident in the safety of your vehicle, you can relax and enjoy your trip, wherever it takes you. The Grand Vitara, with its host of active and passive safety features, gives you peace of mind no matter how tough the terrain you travel.

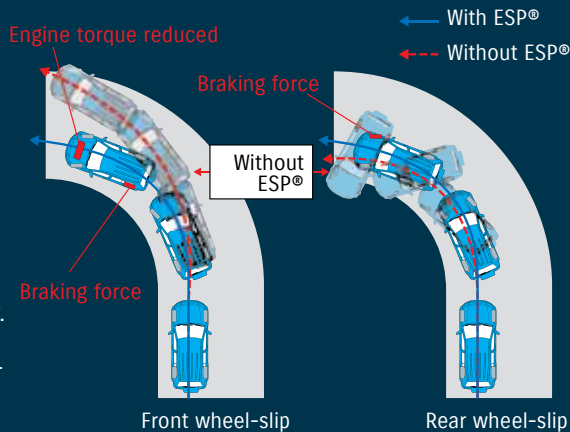

Photo: 5-door Sport model, Bison Pearl Metallic

## Electronic Stability Program

ESP<sup>®\*</sup> (Electronic Stability Program) supplements the Suzuki Grand Vitara's inherent stability with three major functions: ABS with EBD, traction control and stability control. ESP<sup>®</sup>'s ECU uses various sensors to determine and hold the intended cornering line, greatly increasing traction and stability control while reducing front and rear wheel-slip for enhanced safety.

\*ESP is a registered trademark of Daimler AG.

The front bumper under garnish uses SSPP (Suzuki Super Polypropylene), a new material that is lighter and provides better colour than conventional materials; unpainted for greater environmental consideration; and makes scratches less noticeable.

Photo: 5-door Sport model, Bison Pearl Metallic

High levels of occupant protection comprise standard driver's and front passenger's SRS dual front, side and curtain airbags with seatbelt pretensioners and force limiters.

Note: The SRS airbags are shown inflated for descriptive purposes.  
Overseas model shown.

Rear-seat occupants of 5-door models have three 3-point ELR seatbelts.

Standard and optional equipment available may vary for individual markets. Please enquire at your dealers, as specifications and illustrations may refer to models not available in your region. Specifications in non-metric units are approximate. SUZUKI MOTOR CORPORATION reserves the right to change, without notice, prices, colours, materials, equipment, specifications and models, and also to discontinue models.

All photographs in this catalogue were taken with relevant permission. Images of the vehicles without number plates on public roads are composite photos. Vehicles were photographed at a private off-road site with due attention to safety and the environment.
