The bus you've been waiting for
Renault MASTER BUS

The New Renault Master Bus.

Safe. Spacious. Practical. The new Renault Master Bus is a genuine alternative to the same old, same old. Developed specifically for the Australian market, it combines great value for money with high levels of driver and passenger comfort. There's plenty of safety equipment, excellent payload and luggage storage, plus a generous warranty and low servicing costs. Not to mention a highly competitive purchase price. And anyone with a car licence can drive it.

Features by the busload.

Towing: If you need to tow, Master Bus is rated for 2500kg with no reduction in the vehicle payload.

Dimensions: At 6.2m in length, 2.47m wide and 2.47m high, Master Bus is the perfect compromise between exterior size and internal space.

Storage: A class leading 3.5m³ storage space behind the rear seats keeps the cabin area baggage free, leaving more room for passengers.

Standing room height: The Master's low cabin floor allows for up to an exceptional 1.88m of internal standing room, making access easy for even the tallest passengers.

Fuel Tank: The Master's highly efficient diesel engine and 100 litre fuel tank combine to deliver operating economy and long range between fills.

Safety: Accurate and predictable handling backed with a range of electronic systems provide high levels of standard safety.

Engine: The turbo diesel engine delivers 110kW peak power and 350Nm of torque from just 1500rpm.

Driveability: Light controls, good maneuverability, excellent driver comfort and outstanding visibility give Master Bus exceptional drivability. And with a 3.9 tonne GVM, anyone with a normal car licence can drive it.

Seating and comfort: The 12 seats are arranged for excellent accessibility and efficient use of interior space.

Colour: Master Bus comes in a wide range of 7 solid or 3 metallic colours.

Servicing: The lower running costs are further enhanced by long service intervals of 12 months or 30,000km, whichever comes first.

A safe and sound investment.

When it comes to moving people you can never be too safe. That's why a busload of people deserve a bus loaded with safety features.

Master Bus's high level of standard safety equipment includes Electronic Stability Control, anti-lock brakes (ABS), Hill Start Assist, Grip X-Tend, driver and passenger front Airbags, reverse parking sensors and a reversing camera.

Every seat is fitted with a 3-point seat belt. Two seat positions are also fitted with Australian Standards compliant child restraint anchorage points so even the youngest of passengers can travel in safety.

Up front, the ergonomically designed cockpit limits driver distraction and fully-adjustable seating reduces driver fatigue. Front fog lights, powerful cornering headlamps and plenty of glass in the cabin help to further reduce the risk of an accident by increasing the driver's visibility.

1. Safe & Secure. All passenger seats come with integrated head rests and 3-point seat belts. Aisle seats are equipped with adjustable armrests and two positions are fitted with Australian Standards compliant Child Restraint anchorage points. Master Bus shown with optional curtains and premium carpet.

2. Electronic Stability Control. Overseas model shown.

3. Front Airbags. In the cabin, driver and passenger safety is ensured with front airbags. Overseas model shown with optional side airbags.

4. Passenger Wide View Mirror. Overseas model shown.

Class-leading comfort.

Real comfort means having plenty of room to move, and Master Bus doesn't disappoint with a cabin designed with both space and practicality in mind.

The two-tone grey cloth seats are arranged in a 3/2/3/4 configuration, providing loads of comfort and easy accessibility for passengers carrying shopping, luggage or mobility aids. For even greater comfort, the optional Lifestyle Pack includes premium carpet flooring, privacy curtains, LED interior lighting and USB points for each row of seats.

Maintaining a comfortable temperature for everyone onboard is easy with both front and rear air conditioning units and an additional cabin heater.

Passenger comfort and safety is further enhanced by the 3.5m³ storage area behind the last row of seats. This huge space means a clutter free cabin and no need in most cases for a separate trailer.

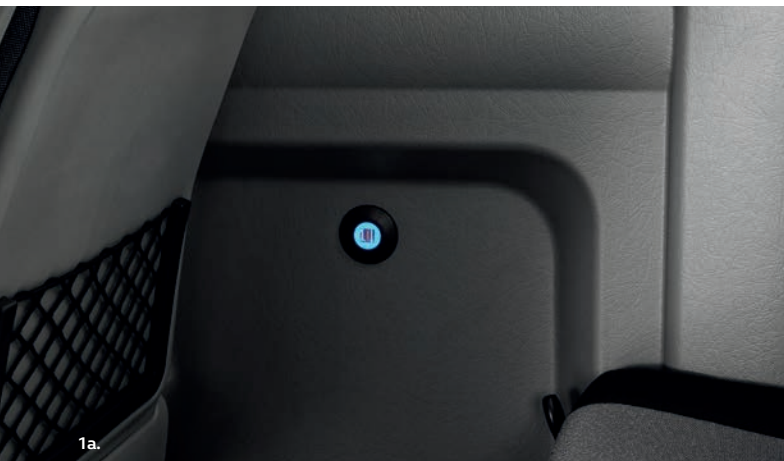

1. Intelligent Cabin. Master Bus comes with a centre passenger bench seat that folds down to become a handy work table. Plenty of internal storage areas provide flexibility in the space upfront.

2. Internal Storage. With approximately 3.5m³ of internal storage and nearly 1.3 tonnes of payload there's no need for a trailer in most cases. Master Bus shown with optional curtains and premium carpet.

3. Room to Move. The seats are arranged in a 3/2/3/4 configuration that maximises cabin space and accessibility. Up to 1.88m of internal standing room is class leading. Master Bus shown with optional curtains, premium carpet and USB sockets.

Performance and technology that really performs.

Driving pleasure isn't a term you often hear to describe a bus, but the Master Bus's unique blend of power, comfort and economy delivers exactly that.

Powered by a 2.3L turbo diesel engine with plenty of go around town or on the highway, Master Bus is also extremely efficient, with a number of innovative engine design features that keep fuel consumption, running costs

and emissions to a minimum. A 100 litre fuel tank means long range and fewer trips to the bowser, while 12 month/ 30,000km service intervals mean fewer trips to the dealer.

And when you consider Renault's economically priced Capped Price Service program* and 3 year/200,000km warranty with 24/7 roadside assist, and it's easy to see that Master Bus stacks up for your bottom line as well.

Master Bus is not only functional, it's full of functionality with standard equipment including Cruise Control, speed limiter, audio streaming Bluetooth, CD/MP3 Radio with steering-mounted controls and a 12V auxiliary power outlet. A wide range of factory options are also available, including the Renault R-Link system that allows control of all phone, audio and navigation services through a single intuitive and intelligent graphical interface.

1–1a. Upgrade to Luxury. Lifestyle options including LED strip lighting, privacy curtains and dual-USB sockets for a truly up-market environment.

2. Steering Wheel Mounted Controls. Immerse yourself in your favourite music or keep connected on the go with the 2x15W CD Radio with Bluetooth® phone pairing,* USB, AUX connectivity and steering wheel mounted controls.

3. 2.3L M9T Turbo Diesel Engine.

*\$349 per service for the first three services as at January 1, 2016.
*Bluetooth® compatibility may vary depending on phone.

Servicing

For easy budgeting, you enjoy Capped Price Services for the first 3 scheduled maintenance services with service intervals of up to 12 months/30,000km apart*. And to minimise disruption to your business, authorised Renault dealers also have low-cost loan vehicles available to use. Simply book one in advance when you book a service with a Renault dealer.

To ensure you enjoy Renault expertise, authorised Renault Dealers have Registered Renault Factory Trained Technicians (COTECHs), only use Genuine Renault parts and equipment and tools specially designed for your Renault. There’s also a 1-year parts and labour guarantee on all repairs and we offer clear, simple and transparent pricing structure for all servicing.

*Scheduled services capped at \$349 per service for 3 years or up to 90,000km (whichever comes first) on new or demonstrator Master Buses.
