# Tiguan

## Hello Confidence

With its superb engine performance, outstanding levels of refinement and cutting-edge suite of technology and driver assistance aids, Volkswagen's new Tiguan is the perfect vehicle for go-anywhere fun.

The Tiguan is the ideal urban explorer, but take it off the beaten track and the essence of this rugged and powerful SUV comes to the fore. There's no limit to what the new Tiguan can do – and where it can go.

Every drive in the Tiguan is a pleasure, no matter which trim level you select. The Tiguan Life feels every inch a luxury medium SUV, with its Digital Cockpit Pro, DAB+ digital radio, all-new 'Touch' control 3-zone climate control and its extensive range of IQ.DRIVE driver assistance and safety technology.

The Tiguan Elegance pushes the bar higher with its new IQ.LIGHT matrix LED headlights offering high-precision illumination of the road ahead, and luxurious fit and finish throughout. And offered for the first time as a standalone variant is the sleek and sporty Tiguan R-Line, complete with aggressive R-Line body styling, a tactile and responsive steering wheel, and quality appointments befitting a top-of-the-range performance vehicle.

You'll want to take every adventure that bit further when you drive the Tiguan. With its 4MOTION all-wheel drive technology and 7-speed DSG gearbox (in all but the base-level Life variant) offering superb traction, handling and power delivery, there isn't a challenge that the Tiguan can't meet head on. At the same time, the Tiguan's impressive levels of comfort and technology will make you want to linger longer behind the steering wheel.

Untameable in spirit, unparalleled in style and peerless in performance, the Tiguan embodies the quintessential SUV driving experience.

# Exterior

The new Tiguan exudes strength and charisma with styling that borrows traditional SUV design cues, but which is undeniably contemporary.

The Tiguan boasts bold bodylines and eye-catching LED lights front and rear, among a host of other appealing exterior features. The entire effect is of a vehicle that conveys understated elegance and confidence, while also bristling with exciting new design additions.

Volkswagen’s new roundel can be found nestled in the Tiguan’s grille, which is neatly bookended by updated LED headlight assemblies featuring High Beam Assist in the Life variant. The Elegance variant ups the ante with IQ.LIGHT matrix headlights and safety sensors that detect oncoming traffic and pedestrians and automatically dim parts of the headlight.

A strong contour line runs down the length of the Tiguan, drawing the eye from front to rear, and creating a sense of streamlined motion. Also prominent when viewing the Tiguan in profile are striking 18” ‘Nizza’ alloy wheels in the Life variant and 19” ‘Auckland’ alloy wheels in the Elegance (both variants offer space-saving spare tyres). Setting the Elegance apart are tinted rear windows, and chrome and silver styling elements throughout, including an appealing chrome strip at the bottom of driver and passenger doors.

At the rear, the Tiguan’s sculpted tailgate features both a Rear View Camera and an electric tailgate mechanism as standard. Attractive LED tail lights straddle the rear side panel and tailgate, with the Elegance variant offering Premium LED lights with dynamic indicators for extra visual impact.

The Tiguan R-Line is never afraid to make a design statement. With its large 20” ‘Misano’ alloy wheels and R-Line themed front and rear bumpers, side sills, rear spoiler, and R-Line badging front and side, the R-Line packs a powerful visual punch.

# Interior

The Tiguan's cabin proves it's what's on the inside that counts. With its outstanding fit and finish, unsurpassed levels of comfort and generous equipment levels as standard, the Tiguan's interior is as impressive as they come. Every drive is a delight when you're nestled in the Tiguan's supportive comfort front seats. The Elegance and R-Line variants even offer electric lumbar support and the convenience of easy entry and memory. Grip the 3-spoke leather covered flat-bottomed steering wheel with gearshift paddles and you'll be immediately impressed by the Tiguan's assured and precise steering response. The R-Line ups the stakes with its R-Line steering wheel with 'Touch' haptic feedback and progressive steering. Touch sensitive climate controls are an exciting new feature in this latest Tiguan. Simply control the vehicle's fan speed and temperature controls by sliding your finger along the control bars or by giving them a gentle push. It's the quality of the Tiguan's air that makes a difference, too. Air Care 3-zone climate control with air cleaning function and allergen filter (Touch Controls added to rear zone climate control replacing hard keys) means you can keep airborne pollutants at bay. Throughout the cabin are reminders that every attention has been paid to comfort and quality. Eye-catching decorative inserts are included in the dashboard and door trim – and differ depending on the Tiguan variant chosen. Choose an ambient lighting theme to suit your mood by selecting from among 30 different interior colour options in the Tiguan Elegance and R-Line. A gearshift knob with leather and matte chrome finish (standard in all variants) provides further evidence of the Tiguan's interior refinement, while the R-Line variant sets itself apart with enticing stainless steel foot pedals.

# Technology and Safety

There can be no denying the impressive levels of technology embedded in every Tiguan – and it’s apparent the moment you sit in the driver’s seat. Now standard across the entire Tiguan range is Volkswagen’s 10.25” Digital Cockpit Pro, a high-resolution display that presents you with an array of information about the vehicle and your journey. Not only is it a pleasure to look at, it’s simple to customise and use. Just configure the display as you want it by using the controls on the Tiguan’s multifunction steering wheel. Also at your fingertips is a world of infotainment options courtesy of an 8” Discover Media navigation system in the Tiguan Life – and a larger 9.2” navigation system in the Elegance and R-Line variants. Every system comes with voice and gesture control, which means you can issue commands without diverting your attention from the road ahead. Easy App-Connect~ functionality with wired and wireless Apple CarPlay® or Android Auto™ means you’re always in control of your favourite in-car mobile phone apps. Of course, the outstanding technology found in the Tiguan extends first and foremost to providing as safe a drive as possible. A range of active and passive safety features are found in every Tiguan, including, for the first time, Proactive Occupant Protection. Part of Volkswagen’s impressive IQ.DRIVE technology suite (for more, see the IQ.DRIVE section), Proactive Occupant Protection prepares the vehicle for impact when it detects a critical situation. The system closes any open windows, including the Tiguan’s panoramic sliding sunroof if it’s fitted, and tightens the front seat belts as a precautionary measure. It’s yet another example of clever Volkswagen technology acting to safeguard vehicle occupants when protection is needed most.

~App-Connect featuring wireless Apple CarPlay® and wireless Android Auto™ is compatible with the latest versions of iOS and Android, active data service required, optional connection cable (sold separately).

# IQ.DRIVE

Nothing is more important than ensuring you and your passengers arrive at your destination safely. It's why Volkswagen has included an extensive suite of driver assistance and safety features in every Tiguan. These intelligent technologies – those that exist now and those yet to come – are bundled together in a package called IQ.DRIVE and will one day facilitate Volkswagen's goal of truly autonomous driving. Central to the safety technology included in IQ.DRIVE is Travel Assist\*, which allows for partially automated driving across a range of speeds, from stop/start city driving through to highway speeds. With Adaptive Cruise Control active, simply press the Travel Assist\* button on the steering wheel to activate adaptive lane guidance to keep your car within lane markings, and to accelerate, brake and maintain your vehicle's position relative to other road users. Front Assist\*\* technology is particularly useful for warning drivers of an imminent collision with a pedestrian.

In keeping with the Tiguan's roll-out of touch-sensitive controls, the R-Line variant has introduced 'Touch' buttons for activating and using Travel Assist\*. These buttons provide haptic feedback in the form of a noticeable vibration when making a selection. Not only that, they are responsive to both slight and firm touches, such as when you wish to advance cruise control speed by a 1km/hr increment versus a 10km/h increment.

Other features of IQ.DRIVE provide comprehensive peace of mind for driver and passengers alike. Park Assist\* is a semi-autonomous driver aid that can avoid bumps and scrapes to your Tiguan by helping you steer into challenging parking spaces.

And Emergency Assist\*\* is capable of monitoring vehicle behaviour to determine if a driver is fatigued or incapacitated. It will issue a series of visual and acoustic warnings to alert a driver if they are inactive for a period of time, and then will intervene to bring the Tiguan to an emergency stop within its lane if needed.

\*Safety technologies are designed to assist the driver, but should not be used as a substitute for safe driving practices.

# Optional Packages

You can supplement your Tiguan’s already generous list of features by choosing a comprehensive optional package. It’s the perfect way to tailor your vehicle to suit your lifestyle needs.

The optional Luxury package is available for the Tiguan Life and offers a range of sophisticated additions to make every journey a pleasure. Contained in the package is electrically operated driver seat with memory function, which makes it easy to find a comfortable driving position. Vienna leather appointed upholstery# is a delight to touch and both driver and passenger front seats can be heated to ward off winter chills.

There’s nothing quite like letting the sun stream into your Tiguan’s cabin via the Panoramic electric glass sunroof, also a feature of the Luxury package. The sunroof’s tilt and slide front section with automatic wind deflector mean you can let natural air circulate into the cabin without the annoying effects of buffeting wind. The Panoramic electric glass sunroof is also available as a standalone option for the Elegance and R-Line variants of Tiguan. It’s the perfect accompaniment to the Sound & Vision package, available for the Elegance and R-Line only, when it comes to sunroof-open, music-up summer fun.

In-car audio has never sounded as good as it does through the Sound & Vision package’s premium Harman Kardon audio system with its 10 crystal clear speakers and a 480w amplifier that offers superb bass response. Four pre-configured sound settings – Pure, Chill Out, Love and Energy – mean you can adapt your listening experience to suit your favourite music.

Also included in the package is Volkswagen’s clever Head Up Display, which projects essential vehicle information such as speed and navigation advice onto a glass panel in front of the driver. And you’ll always have the best view of your Tiguan’s surrounds with Area View\*, which uses cameras right around the vehicle to provide an all-encompassing 360-degree exterior view.

# Colours and Upholstery

The Tiguan’s appealing range of paint options means you can customise your vehicle’s bodywork exactly as you want it. The Life and Elegance variants offer a full array of paint colours, including Pure White, Deep Black Pearl Effect, and four striking metallic options – Reflex Silver, Dolphin Grey, Night Shade Blue and Kings Red. The Tiguan R-Line is offered in the same range of paint colours, except for Kings Red Metallic.

No matter your choice of paint, you can be sure of a perfect upholstery match. ‘Shooting Star’ Titan Black cloth trim is standard for the Life variant, as is Titan Black or Storm Grey Vienna leather appointed upholstery# for the Elegance.

# Peace of Mind

## 5 years Unlimited Kilometre Warranty

At Volkswagen, we pride ourselves on the highest quality standards that come with German engineering.

We back this commitment with a 5 year unlimited kilometre warranty on all new Volkswagen vehicles\*.

## 1 year Roadside Assist

Every new Volkswagen comes with a 1 year Roadside Assist membership^.

That's 24 hour roadside assistance, emergency accommodation, car rental and towing as well as property and other assistance, all included for added peace of mind.

## Volkswagen Care Plans

Volkswagen Care Plans† have you covered for your first 3 or 5 scheduled services, providing you savings off the total Assured Service Pricing RRP. It's convenient, hassle-free scheduled servicing easily available for purchase at your local Volkswagen Dealer.

## Assured Service Pricing

Assured Service Pricing# gives you the transparency of knowing how much your service will cost up front.

Our Volkswagen Dealers have access to the latest diagnostic equipment and tools. Plus, they use Volkswagen Genuine Parts® to ensure your Volkswagen stays a Volkswagen.

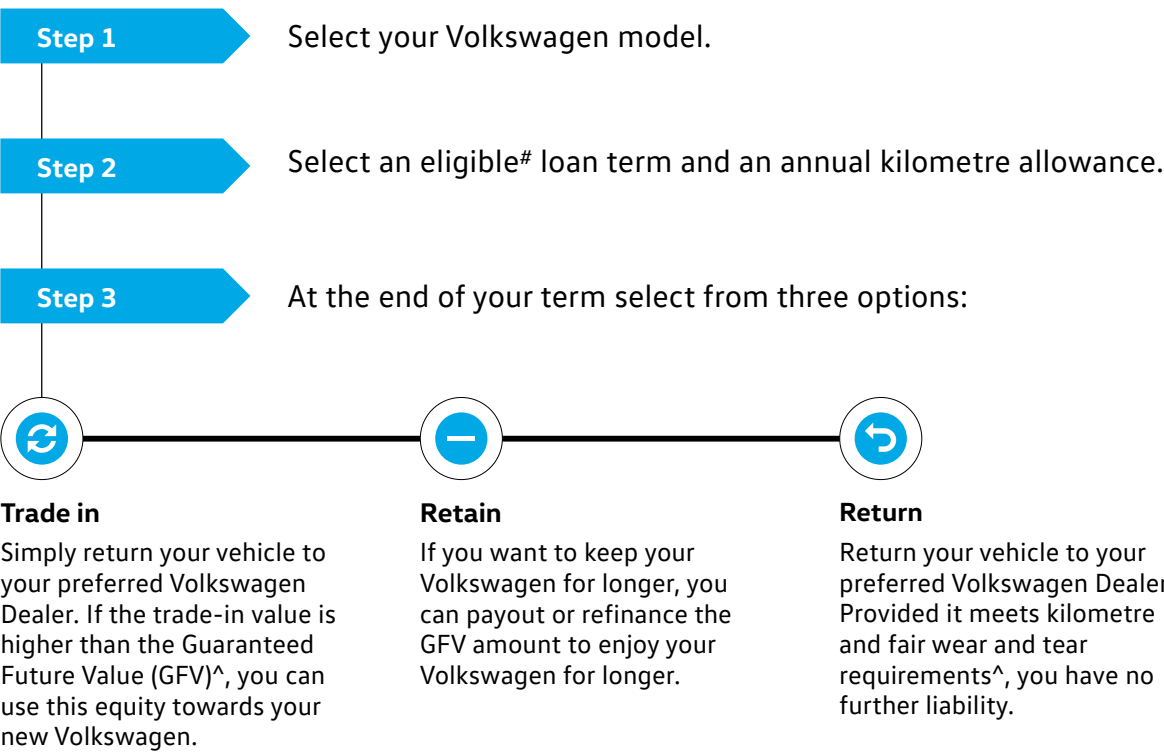

You're in safe hands at your Volkswagen Dealer when it comes to servicing.

# Volkswagen Choice^

Guarantee the minimum future value of your Volkswagen

Naturally we understand that your Volkswagen represents a valuable investment, so we understand that you want to maintain it in premium condition. Volkswagen Choice^ is a finance program tailored to the requirements of Volkswagen owners by providing assurance around your Volkswagen's future value^, whilst offering simple monthly instalment financing options.

Whether you are selecting your new Volkswagen for business or personal use, you can choose the contract term that best suits your requirements. Enjoy the confidence that comes from having locked in a minimum value up front to be attributed to your vehicle at the end of your contract^. There are also no account keeping fees with a fixed interest rate.

\*Conditions and exclusions apply, see <https://www.volkswagen.com.au/en/owners-service/warranty.html>. Your rights under this warranty are provided in addition to, and in some cases overlap with, consumer guarantees under the Australian Consumer Law and do not limit or replace them.

^Volkswagen Roadside Assist membership is provided by AWP Australia Pty Ltd ABN 52 097 227 177 trading as Allianz Global Assistance. Whenever you request roadside vehicle assistance under your membership, you will be making that request to Allianz Global Assistance, who will provide the services under an arrangement with Volkswagen Group Australia. The terms and conditions contain exclusions and limitations, please visit <https://www.volkswagen.com.au/en/owners/roadside-assist.html>.

†Volkswagen Care Plans are available for purchase at <https://www.volkswagen.com.au/en/owners-service/care-plans.html> or from participating authorised Volkswagen Dealers for Eligible Vehicles and covers standard items as contained in each scheduled service interval only. The service intervals occur every 15,000 KM/12 months (whichever occurs first) for all models except Model Year 2018-2020 Crafter and Model Year 2021 Amarok models, which are scheduled to occur every 20,000 km/12 months (whichever occurs first). Excludes Model Year 2021 Crafter vehicles. These Care Plans can only be purchased prior to the first scheduled service and up to 22,500 km/15 months (whichever occurs first) for all models except Model Year 2018-2020 Crafter and Model Year 2021 Amarok models which is 30,000 km/15 months (whichever occurs first). The timeframe takes effect from when the vehicle is first reported in our system as 'sold'. Discount structure varies by model. For details of what is not included in a scheduled service, please refer to the program terms and conditions.

#Assured Service Pricing applies to the first 5 standard scheduled services of your vehicle which are scheduled to occur at every 15,000 km/12 month interval (whichever occurs first ) or for Model Year 2018-2020 Crafter and Model Year 2021 Amarok models only, 20,000 km/12 month interval (whichever occurs first). Excludes Model Year 2021 Crafter vehicles. On or before 31 December each year, Volkswagen will publish the maximum price for a specified Schedule Service that will be applicable from, and remain fixed for, the following calendar year only. For details on the Eligible Model List, pricing, items not included and for full terms and conditions, please see <https://www.volkswagen.com.au/app/locals/service-pricing-guide>.

^Volkswagen Guaranteed Future Value consists of an option to return your vehicle to Volkswagen Financial Services (VFS) ABN 20 097 071 460, Australian Credit Licence 389344, at the end of the term and requires VFS to purchase the vehicle at an agreed price determined by VFS, known as the Guaranteed Future Value (GFV). #Eligible loan terms include 12-60 months, vary by model and are subject to change, ask dealer for more information. At the end of the term, you can elect to: (1) trade-in; (2) return; or (3) retain the vehicle by paying the GFV, which is a lump sum owed to VFS at the end of the loan term after all repayments have been made. You will be liable for any loan contract deficit and additional charges if you exceed the nominated kilometre allowance and/or the vehicle is not in an acceptable condition. Available on new and demonstrator Volkswagen vehicles for selected models. Contact your Official Volkswagen Dealer to verify eligible vehicles for this program. Fleet, government, rental buyers, hire car and chauffeur companies excluded.

\*The Start/Stop system is designed to reduce fuel consumption and CO2 emissions. It achieves this by automatically switching off the engine while the vehicle is stationary and then starting it again automatically when the driver wants to drive off. There are certain operating conditions where the Start/Stop system is deactivated (e.g. during engine warm-up), please refer to the owner's manual for full operating information.

# Please note figures are sourced from overseas data where equipment levels by model variant may vary.

\*\* Fuel consumption figures according to ADR 81/02 derived from laboratory testing. Factors including but not limited to driving style, road and traffic conditions, environmental influences, vehicle condition and accessories fitted, will in practice in the real world lead to figures which generally differ from those advertised. Advertised figures are meant for comparison amongst vehicles only.

# Vehicle Towing

The Owner's Manual contains both general and detailed specific information relating to the vehicle's ability for the towing of trailers and should be referenced to ensure familiarity with its contents. In addition to this information it should also be noted that for the Australian market the maximum permitted vertical load exerted by the trailer drawbar on the ball head of the towing bracket must not exceed the values as stated and shown for each model type below.

Different trailer types and different trailer manufacturers have varying towball downloads. The customer should always contact the trailer manufacturer for information as to the maximum download weight. Volkswagen does not recommend the fitting of load levelling or weight distribution devices when used with a Volkswagen Genuine towbar. When fitted and used correctly, the Volkswagen Genuine towbar is capable of meeting the towbar/towball capacities as stated and shown for each model type below.

## Towing Capacity

**NOTE: Towbar capacities must not be exceeded. Volkswagen Group Australia recommends the use of a Genuine Volkswagen Accessory Towbar. Volkswagen Group Australia does not endorse or will not be held liable for any claim, loss or damage arising from the use or fitment of electronic trailer brakes.**

Tiguan Variant	Model Code	Towbar Capacity Unbraked	Towbar Capacity Braked
110TSI Life	AX**N6	750 kg	1,800 kg
132TSI Life	AX**Q0	750 kg	2,500 kg
162TSI Elegance / R-Line	AX**WT	750 kg	2,500 kg
147TDI Elegance / R-Line	AX**9T	750 kg	2,500 kg
235TSI R	AX**TT	750 kg	2,200 kg

**NOTE: The Maximum Permitted Gross Rear Axle Weight Rating is inclusive of the Maximum Downball Weight and must not be exceeded. The Maximum Downball Weight must also not be exceeded.**

Tiguan Variant	Model Code	Maximum Permitted Gross Rear Axle Weight Rating	Maximum Downball Weight
110TSI Life	AX**N6	1,090 kg	200 kg
132TSI Life	AX**Q0	1,150 kg	200 kg
162TSI Elegance / R-Line	AX**WT	1,150 kg	200 kg
147TDI Elegance / R-Line	AX**9T	1,170 kg	200 kg
235TSI R	AX**TT	1,140 kg	200 kg

**NOTE: The Maximum Gross Vehicle Mass (GVM) and Maximum Gross Combination Mass (GCM) must not be exceeded.**

Tiguan Variant	Model Code	Maximum Gross Vehicle Mass (GVM)	Maximum Gross Combination Mass (GCM)
110TSI Life	AX**N6	2,100 kg	3,900 kg
132TSI Life	AX**Q0	2,260 kg	4,760 kg
162TSI Elegance / R-Line	AX**WT	2,260 kg	4,760 kg
147TDI Elegance / R-Line	AX**9T	2,300 kg	4,800 kg
235TSI R	AX**TT	2,280 kg	4,480 kg

Please note towbar capacities are applicable to the Genuine Volkswagen Accessory towbar. Volkswagen Group Australia does not endorse or will not be held liable for any claim, loss or damage arising from the use or fitment of electronic trailer brakes.

# Glossary

## Adaptive Cruise Control (ACC)

Adaptive Cruise Control (ACC) is an extension of the conventional cruise control system with advanced capabilities based on a radar sensor. When ACC is activated, the vehicle automatically brakes and accelerates to a speed and distance set by the driver.

If the Tiguan approaches a slower vehicle, the ACC brakes the car to the same speed and maintains the pre-selected distance. Even when a vehicle pulls into the same lane in front of you or slows, your vehicle is automatically decelerated to the pre-selected distance. If the vehicle ahead moves out of your lane, the Tiguan then accelerates up to the pre-set desired speed.

Deceleration of the vehicle may take place via intervention in the engine management system. If deceleration via engine torque is not sufficient, brake intervention takes place, braking the vehicle to a standstill if the traffic situation necessitates. ACC can be reactivated automatically by depressing the accelerator pedal.

The dynamics of the ACC system can be individually varied by selecting one of the driving programs from the driver profile selector.

Adaptive Cruise Control (ACC) cannot replace the driver's attentiveness. The driver is still legally responsible for the vehicle and must monitor the speed and distance in relation to other vehicles. The ACC system should not be used on winding roads or in adverse weather conditions such as heavy rain.

## Anti-lock Braking System (ABS)

When braking, wheel speed sensors measure the road wheel speed and should one or more wheels start to lock the ABS system reduces brake pressure to that wheel. This prevents the wheels from locking during heavy or emergency braking, enabling the vehicle to remain steerable.

## Anti-Slip Regulation (ASR)

ASR is a traction control system that prevents the wheels from spinning under acceleration by reducing engine torque.

## Auto Hold function

As soon as the vehicle comes to a complete stop, the ABS hydraulic unit stores the vehicle's final braking pressure. So even when you take your foot off the brake pedal, all four wheels' brakes remain applied, providing increased comfort in stationary traffic. This function is released automatically when you drive off again.

## Brake Assist

During emergency braking, Brake Assist aids the driver by increasing the brake pressure automatically to a level exceeding the locking limit. The ABS is thus quickly brought into the operating range, which enables maximum vehicle deceleration to be achieved.

## Emergency Assist

Emergency Assist monitors the driving characteristics and recognises, within the limits of the system, if the driver suddenly becomes incapable of driving (due to the vehicle not being controlled).

Emergency Assist detects a lack of activity on the part of the driver and issues repeated visual and acoustic warnings and initiates a quick jolt of the brakes to request the driver to take control of the vehicle.

If the driver remains inactive, the system automatically controls acceleration, braking and steering to slow the vehicle down and keep it in the lane. If there is sufficient stopping distance, the system decelerates the vehicle to a complete stop and switches on the electronic parking brake automatically.

When Emergency Assist is actively controlling the vehicle, the hazard warning lights are switched on and the vehicle performs a slight snaking motion within its lane to warn other road users. Ideally this will prevent a collision, or at least reduce its severity.

Emergency Assist cannot replace the driver's attentiveness. The driver is still legally responsible for the vehicle and must monitor the speed and distance in relation to other vehicles. Emergency Assist utilises both the Adaptive Cruise Control (ACC) and Lane Assist driver assistance systems. The ACC system should not be used on winding roads or in adverse weather conditions such as heavy rain. The system will not work if there are no recognisable lane markings. The camera vision can be reduced by rain, snow, heavy spray or oncoming lights. This and vehicles in front of you can lead to the lane markings not being recognised by the Lane Assist system.

## Fatigue Detection

The driver Fatigue Detection system automatically analyses the driving characteristics and if they indicate possible fatigue, recommends that the driver takes a break. The system continually evaluates steering wheel movements along with other signals in the vehicle on motorways and other roads at speeds in excess of 60 km/h, and calculates a fatigue estimate. If fatigue is detected, the driver is warned by information in the Digital Cockpit Pro and an acoustic signal. The warning is repeated after 15 minutes if the driver has not taken a break.

Fatigue Detection cannot replace the driver's attentiveness. The driver is still legally responsible for the vehicle and therefore determining whether or not they are fit to drive. A driving time of 15 minutes is required in order to assess the driver correctly. The functionality of the system is restricted given a sporty driving style, winding roads and poor road surfaces.

## Electronic Brake-pressure Distribution (EBD)

Electronic, more sophisticated means of regulating the ratio of front/rear brake pressure. Settings are varied according to driving and load conditions to ensure each wheel is braked to the optimum extent.

## Electronic Stabilisation Program (ESP)

ABS and ASR traction control systems are integrated into the Electronic Stabilisation Program (ESP). In short, ESP helps ensure that the vehicle goes where you steer it even in extreme driving conditions. The ESP system constantly compares the actual movement of the vehicle with pre-determined values and should a situation arise where the vehicle starts to skid, ESP will apply the brakes to individual wheels and automatically adjust the engine's power output to correct the problem. ESP prevents the vehicle from losing control when trying to avoid an accident, for example. It also reduces the effects of understeer or oversteer.

## Extended Electronic Differential Lock (XDL)

XDL is an extension of the Electronic Differential Lock (EDL) function. When cornering, XDL responds to the load relief at the driven wheel/s on the inside of a corner. The ESP hydraulics are used for the XDL to apply pressure to the wheel on the inside of the corner in order to prevent wheel spin. This improves traction and reduces the tendency to understeer. As a direct result of the one-sided and precise braking pressure, cornering is sportier and more accurate.

## Front Assist with Pedestrian Monitoring

The Front Assist is both a high and low speed AEB monitoring system which uses a radar sensor to detect critical distance situations and thus help to shorten the braking distance, reducing the risk of a rear-end collision.

The traffic ahead is monitored constantly by the radar at the front. If a vehicle is detected ahead of you in the lane, the distance and the speed relative to it are calculated. If the gap is closing too fast, Front Assist initially warns the driver by means of an audible as well as a visual signal. At the same time, the brake pads are brought into contact with the brake discs and the sensitivity of the Brake Assist is increased. This primes the braking system for a possible emergency stop. Furthermore, an automatic jolt of the brakes warns the driver of the danger. If the driver also fails to react to the warning jolt, Front Assist brakes automatically, helping to avoid a collision or reduce the severity of the accident.

At vehicle speeds below 30 km/h, Front Assist monitors the area ahead of the car for vehicles which might present a threat of collision. If a collision is likely, Front Assist first pre-charges the brakes and makes the emergency Brake Assist system more sensitive: if the driver should notice the risk, the car is ready to respond more quickly to their braking action. However, if the driver still takes no action and a collision becomes imminent, Front Assist independently applies the brakes very hard. If the driver intervenes to try to avoid the accident, either by accelerating hard or by steering, Front Assist will deactivate and allow the driver to complete the avoidance manoeuvre.

# Glossary

Pedestrian Monitoring is an extension of the Front Assist monitoring system. The system uses a camera to monitor the side of the road and a radar sensor in the radiator grille to monitor the area in front of the vehicle and within the limits of the system, register certain situations, for example a pedestrian stepping onto the road suddenly. Using the camera the system detects pedestrians on the side of the road and gives an immediate acoustic and visual signal to warn the driver of the possibility of danger. If the radar sensor then detects the pedestrian and the driver does not brake, the system initiates a jolt of the brake as a warning about the critical situation, while at the same time preparing for hard braking. If the driver fails to react, the system automatically performs emergency braking, within system limits. Ideally this will prevent a collision, or at least reduce its severity.

Front Assist with Pedestrian Monitoring cannot replace the driver's attentiveness. The driver is still legally responsible for the vehicle and must monitor the speed and distance in relation to other vehicles.

## Lane Assist

Lane Assist is a lane departure warning system that is designed to help reduce the likelihood of the vehicle leaving the road or crossing into an oncoming lane and therefore the risk of accident as a result of driver distraction or a lapse in concentration.

The Lane Assist system monitors the road ahead with the aid of a camera (located near the interior rear-view mirror) which recognises lane markings and evaluates the position of the vehicle. If the vehicle starts to leave the lane, the Lane Assist system takes corrective steering action. If this is not sufficient the driver is warned about the situation by a steering vibration and is asked to take over the steering. Additionally, if no active steering movements by the driver are recognised for longer than approximately 8 seconds, a message will appear in the Digital Cockpit Pro in conjunction with a warning tone. The corrective steering function can be overridden by the driver at any time and the system does not react if the turn indicator is set before crossing a lane marking.

Lane Assist cannot replace the driver's attentiveness. The driver is still legally responsible for the vehicle and therefore staying in the lane at all times. The system will not work if there are no recognisable lane markings. The camera vision can be reduced by rain, snow, heavy spray or oncoming lights. This and vehicles in front of you can lead to the lane markings not being recognised by the Lane Assist system. The Lane Assist system does not activate at a vehicle speed of less than 65km/h.

## Manoeuvre braking

Manoeuvre braking assists the driver to avoid or reduce damage in a potential collision by initiating emergency braking. It supports the driver during forward and reverse manoeuvring in a speed range of a maximum 10 km/h. If the risk for an accident is recognised, emergency braking is initiated to minimise possible damage.

Manoeuvre braking cannot replace the driver's attentiveness. The driver is still legally responsible for the vehicle. The object must be detected by the sensors. If the driver notices a risk that pedestrians, other vehicles or objects could be damaged they need to react accordingly and stop the vehicle.

## Multi-collision brake

The multi-collision brake has been designed to provide effective assistance for the driver in the moments after an accident. Multi-collision brake triggers automatic controlled braking once an initial collision has been detected so as to reduce the intensity of further accidents after a collision and can help prevent follow-on collisions with oncoming traffic.

The triggering of the multi-collision brake is based on a collision being detected by the airbag sensors. The ESP control unit limits the deceleration of the vehicle by the multi-collision brake to a defined value and vehicle speed. The vehicle can still be controlled by the driver, even when automatic braking is taking place. The driver can interrupt the multi-collision braking at any time by accelerating or braking even more strongly.

## Park Assist

The Park Assist system actively helps the driver when entering or reversing into 90° parking bays, as well as reversing into and driving out of parallel parking spaces. The system works by using sensors mounted either side of the front and rear bumpers together with parking distance sensors front and rear. To park, the driver simply presses the Park Assist button

to select the type of parking manoeuvre and uses the appropriate indicator as the car slowly passes the potential parking space. Sensors scan the size of the parking space as the car is driven past and the driver is alerted if the parking space is big enough. If there is sufficient space, the driver stops the car, selects the correct gear and lets go of the steering wheel.

Park Assist will alert the driver of the intended path and subsequently the appearance of obstacles in the Digital Cockpit Pro, within the driver's field of vision. Park Assist then actively supports the driver by taking over the steering control and parks the vehicle in the available space using the ideal course, if necessary with several moves. The driver can however take over the control of the steering at any time and end the automatic parking procedure.

Park Assist cannot replace the driver's attentiveness. The driver is still legally responsible for the vehicle. If the driver notices a risk that pedestrians, other vehicles or objects could be damaged or if they are uncertain of the risk, they will need to react accordingly and stop the vehicle, ending the function.

## Side Assist with Rear Traffic Alert

Side Assist, is a lane change assistant that detects vehicles on the right and left hand side of the lane, in the blind spot and those vehicles coming nearer behind. The system informs with a warning light in the exterior mirror whenever a detected vehicle is close and a lane change would be dangerous. If the driver sets the indicator, the warning light begins to flash. Rear Traffic Alert warns the driver of approaching traffic at the rear of the car when reversing via an audible warning followed by a visual message in the Optical Parking System (OPS).

Side Assist also works in conjunction with the Lane Assist system. If another vehicle is in the blind spot during a lane change, the dual assist system warns the driver by means of flashing LEDs in the right-hand or left-hand exterior mirror and by vibrations on the steering wheel. It also supports the driver by means of a corrective steering intervention. This procedure occurs regardless of the state of the turn indicators.

## Travel Assist

Travel Assist is an assistance system for partly automated driving. At the push of a button, Travel Assist can support the driver in monotonous and tiring driving situations commonly encountered on long motorway journeys. This system combines the functions of Adaptive Cruise Control (ACC), Lane Assist with adaptive lane guidance and Side Assist to accelerate, brake and maintain the vehicles position within its lane. The capacitive steering wheel can detect whether the driver's hands are on the steering wheel in readiness to steer the vehicle and will issue a visual and audible warning when not detected.

Travel Assist cannot replace the driver's attentiveness. The driver is still legally responsible for the vehicle and must monitor the speed and distance in relation to other vehicles. Travel Assist has been developed for use only on motorways. The ACC system should not be used on winding roads or in adverse weather conditions such as heavy rain. The system will not work if there are no recognisable lane markings. The camera vision can be reduced by rain, snow, heavy spray or oncoming lights. This and vehicles in front of you can lead to the lane markings not being recognised by the Lane Assist system.
