

GREAT WALL STEED SINGLE CAB

Great Wall

Built to Work

SIMPLE, TOUGH AND RELIABLE.
THE NEW GREAT WALL STEED SINGLE CAB
DELIVERS WHAT YOU NEED AND NOTHING YOU DON'T.

PROVEN TECHNOLOGY

The technology in the Steed Single Cab is proven and reliable. Employing a 2l turbo diesel engine (pumping out 110kW of power and 310 Nm of torque) and a 6 speed manual transmission, the Steed single cab inherits the Great Wall reputation for reliability and ease of repair. The 4x4 transfer case is a Borg Warner Torque on Demand unit, recognised for its durability and reliability and ease of use. The Bosch ESP system ensures the Ute behaves itself regardless of the conditions.

1 TONNE PAYLOAD + TOWING

As with the Steed Dual Cab, the single cab uses a tough ladder frame chassis and has a 1 tonne payload. The Steed Single Cab can tow up to 1700kg braked and 750kg unbraked. Just load it up and get the job done.

TOUGH TRAY

The Great Wall Steed Single Cab comes with a high quality Australian aluminium tray that features drop down sides, reliable hinges, window protector and quick lock mechanisms. Measuring 2400mm x 1777mm (internal) the tray is just as tough as the ute.

WHAT'S INCLUDED?

The Steed Single Cab has all the basics in place – air con, leather steering wheel, electric windows, central locking, ABS and Bosch ESP, and tyre pressure monitoring. Its even got Hill Hold Control that briefly stops the ute rolling back on hills and a self-dimming rear view mirror to reduce night time glare.
