

PASSION WITHOUT A REDLINE

The Nissan 370Z Coupe has been passionately designed and engineered to provide an extraordinary driving experience for the sports car enthusiast. Every element of the vehicle is calculated to raise the hair on the back of your neck, make your pulse race, and reawaken your joy of driving. The Nissan 370Z features an aggressive front bumper and grille, stylish LED daytime running lights and 19" forged RAYS alloy wheels framing the bold red brake calipers. As you will discover the Nissan 370Z delivers the ultimate expression of the Nissan philosophy: Innovation that excites.

THE FEELING OF UNLIMITED POSSIBILITIES

It may be roofless but it is just as ruthless. Featuring all the power, handling and style of the Nissan 370Z Coupe, the Roadster goes one step further with the opportunity to enjoy the exhilaration of open air driving – with the touch of a button, the roof stores itself in less than 20 seconds. Plus you'll never need to be concerned about the elements, the seats have the ability to both heat and cool. To ensure that you will be driving like the wind, and not against it, the car also features a tempered glass wind deflector to minimise cabin noise and turbulence.

HISTORY

In the late 1960s, Yutaka Katayama, President of Nissan recognised the need for an affordable sports car and encouraged the creation of the Datsun 240Z. With its launch in 1969, a true automotive dynasty had begun. The Z continued to develop through the 1970s with the 260Z and 280Z both being met with adulation for their engineering and contemporary design. In 1984 the Z was redesigned from the ground up, this produced the 300ZX which was the first Z to be known as a Nissan. 2002 marked the next major milestone for the Z series, with the launch of the multiple award winning Nissan 350Z. The latest Nissan 370Z draws upon this rich heritage, while unashamedly being a car of today. An opportunity for everyone to experience the true joy of sports car driving.

Shiro White Coupe shown.

EXTERIOR STYLING

While you enjoy the thrill of taking the Nissan 370Z through its paces, others will have to be satisfied with merely watching. But don't feel too sorry for them; this car offers many pleasures for spectators too. A variety of graceful curves combine to provide the Nissan 370Z with its striking profile. The front and rear lights have distinctive styling, which gives them a subtle aggressiveness. The 19" forged RAYS alloy wheels and bold red brake calipers add an athletic elegance to the car's contours, while the front underbody spoiler and rear spoiler on the Nissan 370Z Coupe work seamlessly with the rest of the design. The Nissan 370Z Coupe also has a cargo blind to keep items in the rear cargo hidden from view. At the front, powerful Xenon headlights stay sharp and clear thanks to headlight washers. Even the Z badge, side indicator lights and daytime running lights are an understated reminder that this is no ordinary car.

TRANSMISSION

When it comes to controlling all this power, the Nissan 370Z gives you a choice of either a 6-speed close-ratio manual transmission or a 7-speed automatic with Manual Mode (M-Mode). This technology automatically controls and adjusts engine speed when changing gears, essentially altering the throttle as the shift occurs to match the exact engine speed of the next gear position. Not only does this allow you to focus more on braking and steering, but it improves the vehicle's balance and smoothness by reducing the shock that can be experienced when the clutch is engaged. Naturally, for manual drivers who prefer less vehicle intervention, the system can be deactivated at the press of a button.

INTERIOR & TECHNOLOGY

You'll recognise the Nissan 370Z as a new breed of sportscar even before you climb in. Leave the Intelligent Key in your pocket and just push the button on the door handle to open it. Settle into the stylish leather accented* sports seats, with non-slip cloth inserts, designed to hold you snugly as you take the curves. Now, press the engine start button to hear the vigorous burble of the 3.7 litre engine coming to life. The automatic headlights will come on if necessary. Adjust the 4-way power driver and passenger seats to get yourself comfortable and if necessary, turn on the heated seats.

ACTIVE NOISE CANCELLATION & ACTIVE SOUND ENHANCEMENT. Active Noise Cancellation helps remove unwanted low frequency engine noise whilst Active Sound Enhancement helps smooth out and enhance the engine note in the cabin, so you can enjoy the sound of the V6 like never before (not available in Roadster model).

NOT SURE WHERE YOU'RE HEADED? Simply use the touchscreen to call up the HDD Satellite Navigation, making getting to your destination even easier.

NEED TO MAKE A CALL? You'll find the controls for the Bluetooth[®] handsfree phone system on the steering wheel near the cruise and audio controls. To make things easy, you can upload your phone contacts via Bluetooth.[®]

NOW FILL YOUR WORLD WITH MUSIC. The Bose° audio system will surround you with rich, clean sound through eight speakers including two subwoofers. Or connect your iPod° via USB and control your music library with one finger through the touchscreen.

LIKE MORE OPTIONS? Connect your music via Bluetooth® or load your own tracks onto the dedicated 9.3GB music HDD.

NISSAN SAFETY SHIELD® PHILOSOPHY INNOVATION THAT LOOKS OUT FOR YOU.

What if you had the confidence you need for every part of your drive?

Nissan Safety Shield technologies are a comprehensive approach to safety that guide the engineering and development of every vehicle we make. They keep an eye on your vehicle's systems and the surroundings, assist in handling unexpected situations and work to help keep you safe in the unfortunate event of an accident. It's our way of looking out for you.

MONITOR

Smart Technologies that are designed to help monitor conditions. Like a standard rear view camera that helps you notice what's directly behind the vehicle - or what you might have missed - for added peace of mind.

RECOVER

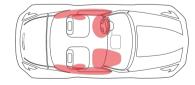

Whether you need to hit the brakes hard or manoeuvre around an unexpected obstacle, these standard technologies help you respond to a potentially harmful situation.

- Vehicle Dynamic Control helps you maintain your steered path.
- Traction Control System helps reduce wheel spin in low-traction situations.
- Anti-lock Braking System helps you maintain steering control around obstacles under heavy braking, while preventing the brakes from locking.
- Electronic Brake force Distribution sends extra force to the rear brakes when you have additional weight of a passenger or cargo in the back.
- Brake Assist helps apply maximum braking force if it detects hard braking and senses you are in an emergency situation.

PROTECT

When a collision is unavoidable, the Nissan Zone Body construction helps absorb the impact while the advanced seat belt and airbag systems help protect all occupants.

Nissan Advanced Airbag System comes with dual-stage supplemental front airbags with seat belt and occupant-classification sensors.

6 STANDARD AIRBAGS

Dual front, dual side and dual curtain SRS airbags will protect the driver and passenger in the case of a front or side impact.
