

IGNIS

Ignite Your *Senses*

The Ignis is an SUV-styled escape hatch that combines a simple, stylish exterior with versatile functionality. The lines of its compact, easy to drive body characterises its personality to increase its presence. The Ignis stirs your senses, hinting the start of something special.

With its simple and iconic design, and functions for a pleasant driving experience, the cabin offers double the fun.

Ignite Your Style

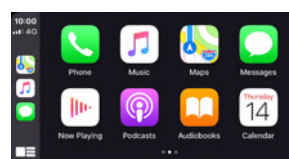

The Ignis's refined design suits formal as well as casual settings. Heading out in the new Ignis will make you confident and bold.

More enjoyable drive with your smartphone

The uniquely designed audio system, positioned independently from the instrument panel, is compatible with Bluetooth®/USB connections and SD card slot (MP3, WMA, AAC compatible). By linking your smartphone or audio device, you can enjoy listening to your favourite songs while you drive. The system also plays radio (AM/FM).

*Bluetooth is a registered trademark of Bluetooth SIG, Inc.

Apple CarPlay lets you use your iPhone to make calls, access your music, send and receive messages, and get directions all with your voice through Siri or by tapping on the audio display.

The information you want, always visible

The meter panel displays basic information like exterior temperature, time of day, mileage, and cruising distance. The information displayed can be changed using switches adjacent to the meter panel or on the steering wheel.

Eyes on the road

Linking your smartphone or audio device enables hands-free calls, volume control, and other convenient features, eliminating the need to remove your hands from the steering wheel.

A solid, linear steering feel

The sporty, high-quality steering wheel has a silver trim and leather finish for a more luxurious feel.

Comfortability for road trips

Use of the cruise control function enables the vehicle to automatically maintain a set speed without the need to operate the accelerator pedal. This reduces driver fatigue when driving at high speeds or over long distances and also improves fuel efficiency by eliminating unnecessary acceleration and braking.

Dynamic colouring

The bold contrast of black and white on the instrument panel and door trim is simple in composition but leaves a powerful impression. Dark blue and silver coloured accents on the centre console and door grips add an energetic feel to the interior atmosphere.

Ignite Your Simplicity

The Ignis let you make the most of your precious and satisfying personal moments.

Outstanding manoeuvrability and high travelling performance

With a minimum turning radius of 4.7m, the Ignis is easy to manoeuvre and drive on narrow roads and car parks. Large-diameter tyres and high ground clearance also provides peace of mind when driving over uneven or bumpy roads.

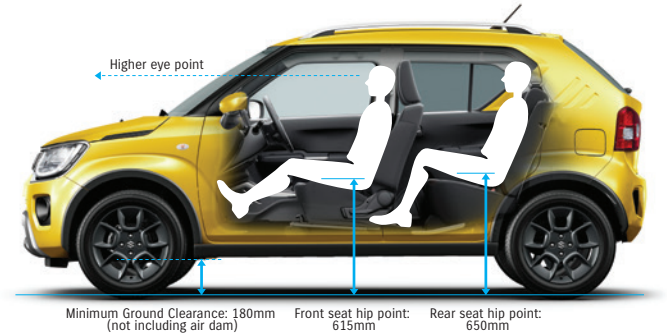

Spacious interior

The adoption of a new-generation platform minimises the size of the engine compartment space to achieve a roomy interior, leaving plenty of space for rear seat passengers.

Seat position designed for comfortable cabin

An elevated seating position enables getting in and out easier and also creates a higher eye point for better visibility.

Convenient, easy-to-use storage space

Luggage space with adjustable capacity to fit your luggage

Despite its compact body, the Ignis boasts luggage space volume measuring 501L.* The 60:40 (GL) or 50:50 (GLX) split rear seats can be folded down from the luggage side as well, making it possible to arrange the space for various kinds of luggage.

*When rear seat is folded down. Measured using the German Association of the Automotive Industry (VDA) method.

Reclining levers

Rear seat split folded【361L】

Excellent driving performance that shines in every situation gives you an exciting ride to your destination.

Ignite Your Spirit

Compact and swift, the Ignis is easy to manoeuvre through narrow city streets and will take you to the doorstep of your destination. Every day spent with Ignis will give continuous comfort and ease.

Newly-developed suspension

The suspension is newly designed to reduce its weight as well as increase its mounting rigidity. In addition to smoothly absorbing shocks from the road surface, it also contributes to a light, stable steering feel directly responsive to the driver's handling.

Aiming for maximum performance with low fuel consumption

In order to provide the optimal engine for the Ignis, numerous improvements were made to achieve high levels of fuel efficiency and power performance. The improved K12C engine leads to smooth running both in everyday use and on long drives.

Engine model	K12C
Displacement (cc)	1,242
Compression ratio	12.5
Maximum output (kW/rpm)	66/6,000
Maximum torque (N·m/rpm)	120/4,400

Choose the right transmission for the way you want to drive

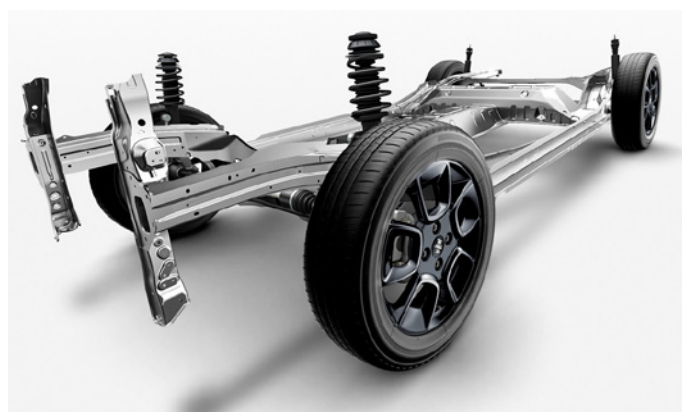

Five-speed manual transmission with a moderate, pleasant shift feel.

CVT offering powerful acceleration performance at low speeds and outstanding fuel efficiency when cruising at high speeds.

A new-generation platform that contributes to fuel efficiency and comfortability

The quality of the ride is determined by the automobile's framework. The smooth, continuous shape of the Ignis chassis secures high rigidity while dramatically reducing reinforcing members and weight. Adopting this new-generation platform contributes to outstanding fuel efficiency and a dramatically improved sense of stability and solidity that belies the vehicle's compact body. Minimising the size of the engine compartment space also secures room for a comfortable interior.

Incorporating the latest safety technology to make every day driving more relaxing.

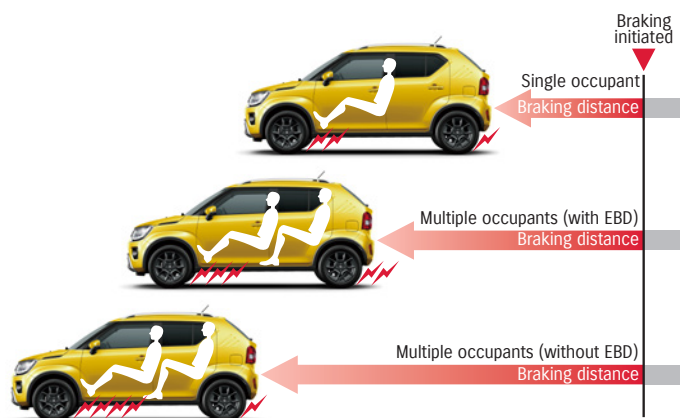

6 Airbags

Driver and passenger seat front, side and curtain SRS airbags are fitted as standard equipment.

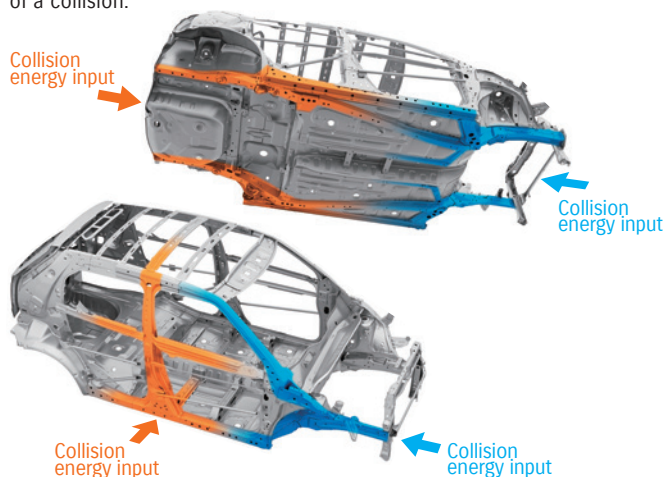

In an emergency braking situation, an Anti-lock Brake System (ABS) keeps tyres from locking up and adds stability to evasive manoeuvres. In addition, Electric Brake force Distribution (EBD) helps maintain control by sending the optimum amount of force to the front and rear wheels.

Total Effective Control Technology (TECT) body

The Ignis's body design centres on Suzuki's TECT concept, resulting in a structure that efficiently absorbs and disperses the energy in the event of a collision.

Body that mitigates pedestrian injury

A shock-absorbing structure is incorporated to the hood, front wiper area, front bumper, and cowl top to mitigate harm to pedestrians in the event of a collision.

Way of Life!

Suzuki's "Way of Life!" is the heart of our brand - every Suzuki vehicle, motorcycle and outboard motor is built to create excitement so customers can enjoy everyday life.
