The world's favourite small car, reimagined.

Experience the sophistication, the excitement, and most of all the fun that can only be had in the world's most popular small car. In a Corolla, your road ahead can be one great adventure.

Corolla was completely redesigned according to the principles of Toyota's New Global Architecture for an even more pleasurable drive. With an

advanced design platform that incorporates outstanding improvements to both body structure and chassis, this is a vehicle that benefits not just from a broader stance for increased stability and advanced independent rear suspension, but also a lower centre of gravity that ensures your ride is smoother and more effortless than ever before.

With Corolla's sharp looks, you'll also move sharply off-the-line thanks to either a 2.0L Dynamic Force petrol engine, or our latest in Toyota Hybrid technology. Both Corolla Hatch and Sedan are also filled with the latest tech and state-of-the-art safety features, delivering a fresh world of thrilling possibilities.

Hybrid Electric: consume less, enjoy more.

Hybrid Electric systems give you the best of both worlds, thanks to the powerful combination of petrol and electric efficiencies working together. Hybrid Electric technology has come a long way – and right from the very start, Toyota has been at the forefront of innovation.

We introduced Prius in 1997 over 25 years ago – our first mass-produced hybrid car that raised eyebrows, generated headlines and got people driving differently. Since then we have continually innovated and improved on the original, saving over 120 million tonnes of CO₂ worldwide.

Today, more and more drivers have embraced Hybrid Electric technology. They are recognising that these vehicles are not only more efficient than ever, they also deliver standout performance while being renowned for hard-wearing quality, reliability and low run costs.

When you start any Hybrid Electric vehicle, you immediately have the power of an electric and a petrol engine working for you seamlessly. It's this combination which produces a driving experience that's uniquely quiet and responsive and produces low emissions with maximum fuel efficiency.

You'll also never have to plan your journey around where the next charge spot is when driving a Hybrid Electric vehicle. There are no plugs, as Toyota Hybrids self-charge as you drive. Many of our new vehicles in the Hybrid Electric range can travel up to 1,000km completely uninterrupted.¹ So you'll enjoy more time driving, and a whole lot less time waiting.

The Hybrid System

Four Key Benefits

Toyota's latest Hybrid Electric technology gets you moving powerfully and smoothly every time. Enjoy an uncompromising drive with responsive, dynamic performance.

Quiet

The quieter and calmer experience in a Toyota Hybrid Electric is proven to deliver one of the most satisfying and enjoyable drives on the road, with no compromise on vehicle responsiveness. It's why millions of Hybrid drivers choose never to go back to petrol-only engines once they've made the switch.

Reliable

Toyota's Hybrid Electric System offers the reliability and quality you can always expect from Toyota. It's technology that's been tested and trusted for over 25 years – so no matter where you go, you'll have peace of mind in every drive.

Powerful

Experience an uncompromising drive in a Toyota Hybrid Electric with responsive, dynamic performance. You get impressive off-the-line torque that gets you moving powerfully and smoothly every time.

Starting off

The electric motor is used primarily and power stored in the battery is used to turn the motor.

Full acceleration

When accelerating or cruising at speed, the petrol engine turns on automatically in addition to the electric motor. Ensuring you receive the power and responsive performance you need.

Braking and deceleration

The electric motor generates power when braking and slowing down, charging the battery. No fuel is used, so there are minimal CO₂ emissions.

Normal driving

A mix of petrol and electric power is used for best economy, depending on the conditions. The battery is recharged where possible.

At rest

With the car brought to a stop, the petrol engine cuts off. The system automatically avoids idling to conserve fuel and reduce CO₂ emissions.

Toyota Safety Sense

At Toyota, we believe it's simply not enough to say "safety comes first" – we prove it. That's why, in our ongoing pursuit of creating ever safer cars, now and into the future, we developed Toyota Safety Sense² (TSS). A suite of active safety features designed to protect us all through helping to support safe driving.

Corolla features TSS driver assistance technologies, aiming to recognise and help avoid certain hazards and collisions, giving you and your passengers greater peace of mind wherever you're headed. Corolla TSS features differ on all models and grades, please visit toyota.com.au for vehicle and specification information.

Lane Trace Assist

When driving on highways and freeways, Lane Trace Assist uses a camera to detect lane markings when cruise control is active. It is designed to alert you and provide steering assistance to help avoid drifting, and keep you centred in your lane.²

Pre-Collision Safety (PCS) system with pedestrian and daytime cyclist detection

Pre-Collision Safety system with pedestrian and daytime cyclist detection is a multi-stage warning system. Using an integrated camera and radar to help detect other vehicles in front of you, the PCS is designed to assist the driver where there is a likelihood of frontal collision with cars and pedestrians during day or night, or cyclists during the daytime. PCS can include a visible and audible alert of possible collisions, additional braking force to assist when you're braking, and if a collision appears to be unavoidable automatic braking to help mitigate impact.²

Road Sign Assist (speed signs only)

Road Sign Assist was developed to help recognise certain road speed signs and provide information to you. It displays the most recently recognised speed limit on the Multi Information Display.²

All-Speed Active Cruise Control

All-Speed Active Cruise Control is designed to help keep a constant distance between vehicles. It uses a millimeter wave radar to monitor the gap between your vehicle and the one in front, automatically accelerating or slowing down when needed to help you maintain a set distance.²

Lane Departure Alert with steering assist

Lane Departure Alert with steering assist is designed to help prevent vehicles drifting from their lane by monitoring road markings, and providing a visible and audible alert should it detect any likely deviation from the lane. It may also apply additional steering force if needed to help you stay in your lane.²

Automatic High Beam

Using a camera to sense either approaching headlights or the tail lights ahead, Automatic High Beam is designed to help you maintain safe and considerate driving by switching between high and low beam as needed.²

The fine edge of inspiration

Buckle up. The time has come for you to experience the next level of sophistication and excitement as you head out on the road to life's great adventures.

The advanced Toyota New Global Architecture (TNGA) design platform was introduced to

incorporate improvements to the overall body structure and chassis, including independent rear suspension and a lower centre of gravity to ensure a more inspired driving experience.

Corolla Hatch not only looks sharp, but it's also sharp off-the-line, powered by either a 2.0L

Dynamic Force petrol engine or the latest Toyota Hybrid technology. It's filled with the latest tech and state-of-the-art safety features to deliver a fresh world of thrilling possibilities.

Stunning all the way through

Step inside Corolla Hatch and elevate your senses.

The thoughtfully crafted interior with contrasting trim flows effortlessly throughout. This modern look and finish is accentuated by a spacious, minimalist layout featuring elegantly styled ornamentation.

The front seats of Corolla hold firm, created to help minimise stress and heighten your overall comfort. On Hatch ZR, there's a choice of luxurious black or red leather accented trim to choose from.

The dual-zone climate control air conditioning on all Corolla Hatch Hybrid, SX and ZR models will keep you cruising in maximum comfort, whatever the weather. And thanks to the new design principles of Toyota's New Global Architecture, all passengers will appreciate generous legroom and headroom.

Designed for maximum convenience, the smart entry and smart start system on all Corolla Hatch Hybrid, SX and ZR models means you can get in and get going with your key still in your pocket or bag.

A seamless world of innovation

All the instrumentation and controls in Corolla Hatch have been designed to promote a blissfully intuitive experience.

The 8" colour touchscreen display incorporates the latest Toyota infotainment features including Bluetooth^{®3} connectivity, Voice Assistant, reversing camera and the myToyota⁴ app to connect with your smartphone for live weather updates, travel and traffic information and more. On Hatch SX and ZR models, satellite navigation⁵ is available. In addition, experience seamless connectivity with Apple CarPlay^{®6,7} (wireless) and Android Auto.^{TM,6,8}

On Hatch ZR models, the 12.3" full digital Multi Information Display (MID) and Head-Up Display interact seamlessly with the colour touchscreen display to provide directions and key driving information right where you need it, so you can keep your eyes on the road.

Hatch SX and ZR models also feature a wireless phone charger.⁹ Hatch ZR features 8-speaker JBL^{®10} premium audio.

The Blind Spot Monitor² (BSM) on Hatch is designed to help detect other vehicles that are approaching the blind spot of the outer mirrors and alerts the driver with indicators on the outer mirror surface. When opening a door, Safe Exit Assist² provides alerts to help avoid collisions with objects or vehicles approaching from the rear.

Toyota Connected Services¹²

12 months complimentary access

Driving should be easy, enjoyable and safe. That's why inside every connected Toyota you'll find a suite of advanced features focused on safety and convenience for a better driving experience, all seamlessly integrated into the myToyota Connect app.¹²

Learn more, and discover the Toyota Connected Services on your vehicle by visiting toyota.com.au/connected

For Toyota Connected Service Packages see toyota.com.au/connected/plans-packages

Test drive the app now, no Toyota required:

Safety and Security

People and property are precious. Toyota Connected Services' advanced features are designed to help protect them all. In emergencies, you can utilise push-button SOS Emergency Call^{13,14} (SOS). It contacts Toyota Emergency Assistance directly, guiding services to your location. In the event of a collision, Automatic Collision Notification^{13,15} (ACN) is designed to activate, calling you directly in-car, and if you are unresponsive, dispatching emergency services to that location. Should your car be reported stolen, Stolen Vehicle Tracking^{13,16} (SVT) will utilise vehicle tracking technology via our Stolen Vehicle Assistance Call Centre to help police to potentially recover your vehicle.

Remote Connect*

Control vehicle functionality, even when you're not in the driver's seat. Our Connected features enable you to remotely start your engine (up to 10 mins prior), lock and unlock doors and boot, as well as activate remote horn buzzer, hazard and headlights. Perfect for locating your vehicle in a crowd, or just flagging emergencies. You can even heat or cool your car automatically before you step in with Toyota's Remote Climate Control feature.

*Not available on Hatch Ascent Sport Petrol

Driver Insights

The myToyota Connect app gives you a complete view across your entire drive. Review recent trips and, with Drive Pulse Score,¹⁷ understand how braking and cornering can be improved to help maintain your car. The features let you run quick checks on odometer and fuel levels to aid journey planning. You can also spot unlocked doors or windows left open away from your car using the in-app Vehicle Status features, and set up alerts. A Vehicle Locator also helps you find where you last parked, and our Glove Box feature opens access to digital warranty and manuals for you.

Multimedia Connect

Toyota's interconnected multimedia platform includes Connected Navigation which provides current parking availability, traffic, weather and fuel prices for your journey. Through Connected Voice Assistant, control vehicle features including navigation, audio and climate settings. With Connected Trip Start and Finish features you can plan routes, search a point of interest and send it to your car. When driving and not reaching your endpoint, the app notes the full route when you park, allowing you to continue navigation on foot with your phone or device.

A stylish
expression
of power

Corolla Hatch has been designed to deliver a thrilling drive with a choice of either a powerful petrol engine or advanced Toyota Hybrid Technology.

The 1.8L latest generation Corolla Hybrid system is even more responsive, delivering impressive off-the-line acceleration and a smooth driving experience, as well as enviable fuel efficiency.

The 2.0L 4-cylinder Dynamic Force petrol engine delivers a boost in performance and response. It features Toyota's latest thinking to reduce engine weight yet increase power to a hefty 126kW and peak torque of 203Nm.

The direct shift Continuously Variable Transmission (Auto CVT) offers powerful acceleration, fuel efficiency and quietness.

The continuously variable steel belt transmission is combined with a highly efficient gear transmission. Its innovative 'launch gear' provides thrilling acceleration off-the-line, then delivers an incredibly smooth and quiet drive by integrating and adapting to different vehicle and driving characteristics. Plus you can engage manual gear selection should greater response and control be required.

For perfectly tuned performance, Active Cornering Assist (ACA) uses sensors and actuators to control the force through the driving wheels and braking system to help ensure excellent cornering control and fully utilise the grip of the tyres.

Stylish and sophisticated Corolla Sedan

The aerodynamic lines of Corolla Sedan elegantly express all of its refinement and attention to detail. More than just dynamic on the road, it's a fresh dimension of style that delivers a strong, self-assured presence of modern prestige. The raised engine hood and deeply sculptured bumper corners on Corolla Sedan create a strong 3-dimensional appearance. The wide grille combines with the headlamps and trapezoid bumper structure to express movement while always presenting a strong, solid stance on the road. The Bi-Beam LED headlamps will light the way on the darkest nights.

Space to spare

When you're seated inside the Corolla Sedan the first thing you'll notice right away is the sense of space. This is a stylish, four-door sedan that has been created not only to accommodate the driver with ease, but your passengers as well.

The inside cabin build is robust and durable, so it's ready for everyday drives as well as friends, family and pets. The impressive 470L boot capacity accommodates golf clubs to groceries. Instrument panels in front of the driver are slim and streamlined, while maintaining excellent navigation and visibility.

The Corolla Sedan comes with standout interior features. Starting with the Ascent Sport, split fold rear seats and a broad range of Toyota Safety Sense² features come as standard. Move up to the SX where satellite navigation, Rear Cross Traffic Alert and Blind Spot Monitor are added. On the top of the range ZR, heated front seating with premium interior trim and a Head-Up Display round off the impressive interior package.

Innovative instruments

The data you receive while you drive can make all the difference. The 4.2" Multi Information Display (MID), or 7" on SX and 12.3" full digital on ZR models, shows a selection of essential vehicle detail right where you need it. On Corolla ZR variants, a Head-Up Display shows various driving related items and warnings in your field of view on the windshield glass, allowing you to focus on the road and reduce eye movement.

The Corolla Sedan also has multimedia features that include Apple CarPlay^{®6,7} and Android Auto.^{™,6,8}

Ascent Sport Hybrid, SX and ZR models also feature satellite navigation⁵ which helps to ensure effortless travel and the ability to update and guide according to live traffic conditions. Wireless phone charging⁹ is also a convenient addition to SX and ZR models, and smart entry and smart start system functionality come standard on all Corolla Sedan models.

- A 12.3" full digital Multi Information Display – ZR only

A top-down view of a car's interior with all seven SRS airbags deployed. The front passenger airbag is on the left, the driver's airbag is in the center, and the rear airbags are on the right. The seats are dark-colored with a textured pattern.

Safety by design

.....

You can drive with confidence knowing the Corolla Sedan is equipped with advanced safety features and technology.

There are seven SRS airbags to help protect the driver and passengers, while Anti-lock Braking System (ABS) helps prevent wheel lock-up and skidding, and Vehicle Stability Control (VSC) helps counteract any oversteer or understeer when cornering. Traction Control (TRC) automatically controls engine output or applies the brakes to any wheel that's skidding on slippery surfaces or where there's variable grip. Emergency Brake Signal (EBS) alerts trailing vehicles if you're forced to make a sudden stop.

In addition to all of this, you'll have the added benefits of a number of Toyota Safety Sense² (TSS) technologies: Lane Trace Alert with steering assist, Pre-Collision Safety system with pedestrian and day time cyclist detection, Road Sign Assist (speed signs only), Active Cruise Control, Lane Departure Alert, Automatic High Beam, Emergency Driving Stop System (EDSS).

The insurer of Toyota Car Insurance is Aioi Nissay Dowa Insurance Company Australia Pty Ltd ABN 11 132 524 282, AFSL 443540 (Adica). If Toyota Car Insurance is purchased online, the issuer and insurer is Adica. *This figure represents the total number of Toyota vehicles that have been insured by Toyota Insurance as at November 2021.
- 24 Lower monthly repayments compared to a similar term with no Guaranteed Future Value (GFV) or equivalent balloon final payment. Total interest charges will be higher if a GFV or balloon final payment is selected.
- 25 Guaranteed Future Value (GFV) is the minimum value of your new or approved demonstrator Toyota at the end of your finance contract, as determined by Toyota Finance subject to fair wear and tear and agreed kilometres being met. Ask your dealers for more information. Approved applicants only. T&Cs apply. Toyota Finance Australia Limited ABN 48 002 435 181, AFSL and Australian Credit Licence 392536.
- 26 Applicable to pre-owned vehicles purchased as a Toyota Certified Pre-Owned (TCPO) vehicle on or after 01/01/2022. TCPO 2022 Warranty expires 1 year after sale, or 1 year after the current New Vehicle Warranty expires (if applicable), or 10 years from date of registration in original owner's name, or at 160,000kms (whichever occurs first). TCPO Warranty does not apply to vehicles used for commercial purpose (eg taxi or rideshare). See toyota.com.au/tpowarranty for T&Cs. This warranty does not limit and may not necessarily exceed your rights under the Australian Consumer Law.
- 27 The Toyota Warranty Advantage Extended Engine and Driveline coverage is for 7 years from delivery, provided your vehicle is properly serviced and maintained per its Warranty and Service Book. Excludes vehicles used for a commercial purpose, such as taxis, hire vehicles and vehicles transporting people or goods for payment including rideshare. See toyota.com.au/owners/warranty for details. This warranty does not limit and may not necessarily exceed your rights under the Australian Consumer Law.
