Tiguan Allspace

No SUV comes close to offering the practicality, comfort and style encapsulated by Volkswagen's latest Tiguan Allspace. Every consideration has been given to maximising space and function to create an SUV that can go anywhere and do anything.

There's no rulebook that says your exploring days are over once you've decided to have a family. The opposite is true. With its occasional seven seats, the Tiguan Allspace makes it easy for families with kids, and those about to embark on parenthood, to maintain their spirit of adventure.

The Tiguan Allspace makes light work of transporting large families on road trips up or down the coast. And when the rear row of seats is not in use – because the seats are there only when you need them – there's plenty of room spare for life's everyday transportation challenges, whether stowing a golf bag and cart or boxes of groceries. The latest Tiguan Allspace takes all the best elements of the previous generation and adds all-new design features and levels of technology for a thoroughly modern makeover. A striking horizontal LED light bar and LED matrix headlights in all but the entry-level variant are striking new design additions. And an array of new conveniences across the entire range, such as Digital Cockpit Pro, Wireless ~App-Connect and Wireless Phone Charging, make this one of the most driver-focused SUVs available.

Perhaps best of all, the flagship Tiguan Allspace R-Line, with its appealing R-Line design and 20-inch alloy wheels, has now become a standalone vehicle. What better way to combine SUV space and practicality with performance-inspired design than in this new offering from Volkswagen.

With this much personality, comfort and space combined, the Tiguan Allspace could just be the SUV with everything.

~App-Connect is compatible for selected apps with the latest smartphone versions of iOS and Android, active data service, and connection cable (sold separately).

Exterior

Volkswagen's Tiguan Allspace is known for its bold SUV presence and streamlined contours. The latest generation takes the model's traditional design and updates it with an undeniably fresh and attractive take on SUV styling.

Foremost among the changes made to the range is the introduction of a horizontal LED light bar to the centre grille of the Elegance and R-Line variants. The LED light bar travels behind the prominent VW roundel and connects harmoniously with the daytime light signature of the IQ.LIGHT headlights. Both Elegance and R-Line variants feature Matrix LED headlights that have a beam pattern that can be individually adapted to all driving situations. Instead of fog lights, they also have an all-weather light function that effectively illuminates the road in poor driving conditions caused by rain or fog. Static cornering lights come on simultaneously with the main beam for precision light performance. Unique light assemblies at the rear set the Tiguan Allspace further apart from other SUVs on the road. The R-Line variant incorporates Premium LED tail lights with an alternating 'click/clack' effect between tail light and brake light that is fast becoming a hallmark of the Volkswagen brand.

Individual design elements differentiate one variant from the other. The Tiguan Allspace Life rides on distinctive 18-inch 'Kingston' alloy wheels, while the Elegance features 19-inch 'Auckland' alloy wheels, together with tinted rear windows and a number of additional chrome and silver styling elements.

The sporty demeanour of the R-Line is epitomised by its large 20-inch 'Misano' alloy wheels and prominent R-Line front and rear bumpers, side sills and spoiler. R-Line badges on the front grille and side spears signal that it is the highest category of Tiguan Allspace.

Tiguan Allspace R-Line shown

Interior

The Tiguan Allspace has been specifically designed with the needs of busy families in mind. With its occasional seven-seat capacity and roomy cabin, the Tiguan Allspace is the perfect companion for trips long and short. Add to that a 230-litre boot space with the third row of seats up and impressive equipment levels and the Tiguan Allspace becomes the consummate SUV explorer.

The latest Tiguan Allspace wholeheartedly embraces wireless connectivity. It features a Qi wireless phone charging pad in addition to Wireless ~App-Connect, which uses Apple CarPlay and Google Android Auto to give you access to all of your favourite smartphone apps. You never have to worry about unsightly cables again.

The vehicle also ushers in a new era of digitalisation with its high-tech screens capable of displaying a vast range of driving information. A 10.25-inch Digital Cockpit Pro display is offered with an 8-inch Discover Media navigation system (with voice and gesture control) in the Life variant, while the Elegance and R-Line variants both receive a 10.2-inch Discover Pro navigation system. A Digital DAB+ radio is standard across the range, providing crystal-clear audio far superior to that of traditional AM and FM broadcasts.

It's easy to set and enjoy a comfortable temperature in the Tiguan Allspace. Touch Climate Controls use touch sensitive surfaces to control fan speed and temperature controls, with a touch control panel offered in the second row of seats. The Elegance and R-Line variants also offer ventilated front seats (also available in the Luxury package for the Tiguan Allspace Life variant).

Befitting its position at the pinnacle of the range, the Tiguan Allspace R-Line receives additional in-cabin comforts. An R-Line steering wheel, 'Carbon Grey' decorative inserts, a black headliner and stainless steel foot pedals all combine to give the cabin an exclusive air.

Performance

The Tiguan Allspace provides stirring performance from its range of powerful and efficient engines. For sheer driveability in a practical and spacious SUV, the Tiguan Allspace proves it's hard to beat.

A variety of engine options are available depending on the equipment grade selected. The Tiguan Allspace Life variant is powered by a choice of economical 1.4-litre 110TSI engine or spirited 2.0-litre 132TSI engine. The engines are paired with a precise 6-speed Direct Shift Gearbox (DSG) and 7-speed DSG respectively.

Volkswagen's ever-reliable 4MOTION all-wheel drive system and 7-speed DSG feature in all of the Tiguan Allspace variants except for the entry-level 110TSI variant. 4MOTION is the perfect complement to the 2.0-litre 162TSI engines available in the Tiguan Allspace Elegance and R-Line models. 4MOTION ensures that power is distributed to all four wheels, except when a loss of traction is detected. Power is then transmitted to wheels with grip in a fraction of a second to maintain optimum traction at all times. The result is improved grip in slippery conditions and greater ride stability.

Performance in the Tiguan Allspace isn't just about conveying power to the bitumen – it's a tactile experience to be enjoyed. Grip the 3-spoke leather-covered flat-bottomed steering wheel with gearshift paddles and you'll be immediately impressed by the Tiguan's invigorating acceleration and assured and precise steering feedback.

The R-Line makes spirited driving even more enjoyable with its contoured steering wheel offering progressive steering for heightened vehicle feel and response through twisting corners. Stainless steel foot pedals are a sporty addition to the top-of-the-line Tiguan Allspace and add extra pleasure to the driving experience.

Tiguan Allspace R-Line shown.

Technology

The Tiguan Allspace incorporates the very latest technological advances to ensure optimal levels of comfort, convenience and safety. Best of all, a comprehensive array of driver assistance and safety aids are included as standard across the entire range.

Volkswagen uses the term IQ.DRIVE* to denote the suite of technologies used in all its vehicles to enhance driver and passenger safety. Included as part of IQ.DRIVE* is Travel Assist*, an innovative feature that allows for partially automated driving at a range of speeds. Travel Assist* uses the combined functions of Adaptive Cruise Control (ACC)*, Lane Assist* to accelerate, brake and maintain the Tiguan Allspace's position within its lane.

The Travel Assist* system can be activated with a simple press of a button on the all-new steering wheel. In the Tiguan Allspace R-Line, conventional steering wheel buttons are replaced with 'touch' buttons that provide haptic feedback when selected.

Other driver aids contained in IQ.DRIVE* are there to help drivers overcome everyday challenges associated with city driving. Park Assist* takes the stress out of parking by helping the driver manoeuvre into a tight space. And Keyless Entry means you can always open the vehicle easily, even with your hands full.

*Safety technologies are designed to assist the driver, but should not be used as a substitute for safe driving practices.

Tiguan Allspace R-Line shown

Tiguan Allspace R-Line shown

Optional Packages

The Tiguan Allspace features an extensive range of driver aids and comforts as standard, with even more fantastic inclusions available when an optional package is chosen.

The Luxury Package is available for the entry-level Life variant and adds several features to pamper and soothe vehicle occupants. Vienna leather-appointed upholstery[^] makes seats supremely comfortable, while heated and ventilated front seats ensure driver and front passenger maintain a pleasant body temperature. Electrically adjustable driver seat with memory function is a particularly useful function when driving duties are shared with other family members.

A panoramic electric glass sunroof is included in the Luxury Package, but is also available as a stand-alone optional inclusion in the Tiguan Allspace Elegance and R-Line variants. The sunroof incorporates a slide and tilt front section, an automatic wind deflector and a UV-resistant electronic blind that provides unforgettable views of the vehicle's surrounds when open.

Drivers who relish a high-quality audio experience will be delighted by the pristine sound quality offered by the optional Sound & Vision Package available for the Tiguan Allspace Elegance and R-Line variants. A Harman Kardon Premium Sound System with 10 speakers and powerful 480 watt amplifier delivers stunningly clear audio reproduction to invigorate every drive.

An Area View surround view camera system is an additional feature, providing a bird's eye view of the Tiguan Allspace to ensure it remains clear of any obstacles.

[^]Leather appointed seats have a combination of genuine and artificial leather, but are not wholly leather.

Colours & Upholstery

Tiguan Allspace owners are spoilt for choice when it comes to paint colours. Select from among Pure White, Deep Black Pearl Effect and a range of appealing metallic colours: Pyrite Silver Metallic, Platinum Grey Metallic, Atlantic Blue Metallic and Kings Red Premium Metallic (not available for Tiguan Allspace R-Line).

Pure White

Pyrite Silver M

Platinum Grey M

Atlantic Blue M

Kings Red PM

Deep Black PE

Please note that metallic and pearl effect paint are optional at extra cost. The print process does not allow for exact reproduction of the exterior or the upholstery colours. Please contact your Volkswagen Dealer for further information on colours and upholstery combinations. Please note: Metallic (M), Pearl Effect (PE) and Premium Metallic (PM) paint are optional at additional cost. Tiguan Allspace Elegance shown

Inside the cabin, soft 'Life' Titan Black cloth trim is standard in the Tiguan Allspace Life, with the option of choosing leather-appointed seats as part of the Luxury Package. The higher-specification variants all receive smooth Vienna leather-appointed upholstery. 'Titan Black' and 'Storm Grey' Vienna upholstery are available in the Elegance variant, while the Tiguan Allspace R-Line receives sophisticated R-Line Vienna leather-appointed upholstery.

- 10 20" Kapstadt Alloy Wheel
- 11 Roof box
- 12 Bike carrier
- 13 Ski and snowboard carrier
- 14 Boot organiser

Overseas models are shown for illustrative purposes only. Optional accessories are available at an extra cost. Please note that the above accessories may have an effect on fuel efficiency. Items such as tablets and sports equipment are for illustration purposes only and are not available for purchase from Volkswagen Group Australia or its dealers. For a full range of Volkswagen Genuine Accessories, please visit www.volkswagen.com.au.

5 years Unlimited Kilometre Warranty

At Volkswagen, we pride ourselves on the highest quality standards that come with German engineering.

We back this commitment with a 5 year unlimited kilometre warranty on all new Volkswagen vehicles¹.

1 year Roadside Assist

Every new Volkswagen comes with a 1 year Roadside Assist membership².

That's 24 hour roadside assistance, emergency accommodation, car rental and towing as well as property and other assistance, all included for added peace of mind.

Volkswagen Care Plans

Volkswagen Care Plans³ have you covered for your first 3 or 5 scheduled services, providing you savings off the total Assured Service Pricing RRP. It's convenient, hassle-free scheduled servicing easily available for purchase at your local Volkswagen Dealer.

Assured Service Pricing

Assured Service Pricing⁴ gives you the comfort to know the cost of your first 5 scheduled services, when servicing your vehicle at any authorised Volkswagen dealership.

Our Volkswagen dealers have access to the latest diagnostic equipment and tools. Plus, they use Volkswagen Genuine Parts[®] to ensure your Volkswagen stays a Volkswagen.

Volkswagen Choice[^]

Guarantee the minimum future value of your Volkswagen

Naturally we understand that your Volkswagen represents a valuable investment, so we understand that you want to maintain it in premium condition. Volkswagen Choice[^] is a finance program tailored to the requirements of Volkswagen owners by providing assurance around your Volkswagen's future value[^], whilst offering simple monthly instalment financing options.

Whether you are selecting your new Volkswagen for business or personal use, you can choose the contract term that best suits your requirements. Enjoy the confidence that comes from having locked in a minimum value up front to be attributed to your vehicle at the end of your contract[^]. There are also no account keeping fees with a fixed interest rate.

1. Conditions and exclusions apply, see <https://www.volkswagen.com.au/en/owners-service/warranty.html>. Your rights under this warranty are provided in addition to, and in some cases overlap with, consumer guarantees under the Australian Consumer Law and do not limit or replace them.

2. Volkswagen Assist (Roadside Assistance) Conditions and exclusions apply, see <https://www.volkswagen.com.au/en/owners-service/service-repairs-parts/roadside-assist.html>

3. Volkswagen Care Plans are available for purchase at <https://www.volkswagen.com.au/en/owners-service/service-repairs-parts/care-plans.html> or from participating authorised Volkswagen Dealers for Eligible Vehicles and covers standard items as contained in each scheduled service interval only. The service intervals occur every 15,000 KM/12 months (whichever occurs first) for all models except MY18 to current Crafter vehicles and MY21 and MY22 Amarok vehicles, which are scheduled to occur every 20,000 km/12 months (whichever occurs first). These Care Plans can only be purchased prior to the first scheduled service and up to 22,500 km/15 months (whichever occurs first) for all models except MY18

to current Crafter vehicles and MY21 and MY22 Amarok vehicles which is 30,000 km/15 months (whichever occurs first). The timeframe takes effect from when the vehicle is first reported in our system as 'sold'. Discount structure varies by model. For details of what is not included in a scheduled service, please refer to the program terms and conditions.

4. Volkswagen Assured Service Pricing is current as at the date the customer obtains a price from the Volkswagen Service Pricing Guide or from a participating authorised Volkswagen dealer and is subject to change without notice. Customers are advised to confirm current pricing on the Volkswagen Service Pricing Guide or with an authorised Volkswagen dealer on the day of each scheduled service. Volkswagen Assured Service Pricing applies to the cost of standard items in each of the first 5 standard scheduled services of your vehicle which are scheduled to occur at every 15,000 km/12 month interval (whichever occurs first) or for MY18 to current Crafter vehicles and MY21 and MY22 Amarok vehicles only, 20,000kms/12 month interval (whichever occurs first). Exclusions and conditions apply. For more details on the eligible models, pricing, items not included and for full terms and conditions, please see <https://www.volkswagen.com.au/app/locals/service-pricing-guide>. Volkswagen Australia reserves the right to at any time modify or discontinue the Volkswagen Assured Service Pricing program.

[^]Volkswagen Guaranteed Future Value consists of an option to return your vehicle to Volkswagen Financial Services (VFS) ABN 20 097 071 460, Australian Credit Licence 389344, at the end of the term and requires VFS to purchase the vehicle at an agreed price determined by VFS, known as the Guaranteed Future Value (GFV). [#]Eligible loan terms include 12-60 months, vary by model and are subject to change, ask dealer for more information. At the end of the term, you can elect to: (1) trade-in; (2) return; or (3) retain the vehicle by paying the GFV, which is a lump sum owed to VFS at the end of the loan term after all repayments have been made. You will be liable for any loan contract deficit and additional charges if you exceed the nominated kilometre allowance and/or the vehicle is not in an acceptable condition. Available on new and demonstrator Volkswagen vehicles for selected models. Contact your Official Volkswagen Dealer to verify eligible vehicles for this program. Fleet, government, rental buyers, hire car and chauffeur companies excluded.

*The Start/Stop system is designed to reduce fuel consumption and CO₂ emissions. It achieves this by automatically switching off the engine while the vehicle is stationary and then starting it again automatically when the driver wants to drive off. There are certain operating conditions where the Start/Stop system is deactivated (e.g. during engine warm-up), please refer to the owner's manual for full operating information.

~ Fuel consumption figures according to ADR 81/02 derived from laboratory testing. Factors including but not limited to driving style, road and traffic conditions, environmental influences, vehicle condition and accessories fitted, will in practice in the real world lead to figures which generally differ from those advertised. Advertised figures are meant for comparison amongst vehicles only.

Please note figures are sourced from overseas data where equipment levels by model variant may vary.

Glossary

Adaptive Cruise Control (ACC)

Adaptive Cruise Control (ACC) is an extension of the conventional cruise control system with advanced capabilities based on a radar sensor. When ACC is activated, the vehicle automatically brakes and accelerates to a speed and distance set by the driver.

If the Tiguan approaches a slower vehicle, the ACC brakes the car to the same speed and maintains the pre-selected distance. Even when a vehicle pulls into the same lane in front of you or slows, your vehicle is automatically decelerated to the pre-selected distance. If the vehicle ahead moves out of your lane, the Tiguan then accelerates up to the pre-set desired speed.

Deceleration of the vehicle may take place via intervention in the engine management system. If deceleration via engine torque is not sufficient, brake intervention takes place, braking the vehicle to a standstill if the traffic situation necessitates. ACC can be reactivated automatically by depressing the accelerator pedal.

The dynamics of the ACC system can be individually varied by selecting one of the driving programs from the driver profile selector.

Adaptive Cruise Control (ACC) cannot replace the driver's attentiveness. The driver is still legally responsible for the vehicle and must monitor the speed and distance in relation to other vehicles. The ACC system should not be used on winding roads or in adverse weather conditions such as heavy rain.

Anti-lock Braking System (ABS)

When braking, wheel speed sensors measure the road wheel speed and should one or more wheels start to lock the ABS system reduces brake pressure to that wheel. This prevents the wheels from locking during heavy or emergency braking, enabling the vehicle to remain steerable.

Anti-Slip Regulation (ASR)

ASR is a traction control system that prevents the wheels from spinning under acceleration by reducing engine torque.

Auto Hold function

As soon as the vehicle comes to a complete stop, the ABS hydraulic unit stores the vehicle's final braking pressure. So even when you take your foot off the brake pedal, all four wheels' brakes remain applied, providing increased comfort in stationary traffic. This function is released automatically when you drive off again.

Brake Assist

During emergency braking, Brake Assist aids the driver by increasing the brake pressure automatically to a level exceeding the locking limit. The ABS is thus quickly brought into the operating range, which enables maximum vehicle deceleration to be achieved.

Emergency Assist

Emergency Assist monitors the driving characteristics and recognises, within the limits of the system, if the driver suddenly becomes incapable of driving (due to the vehicle not being controlled).

Emergency Assist detects a lack of activity on the part of the driver and issues repeated visual and acoustic warnings and initiates a quick jolt of the brakes to request the driver to take control of the vehicle.

If the driver remains inactive, the system automatically controls acceleration, braking and steering to slow the vehicle down and keep it in the lane. If there is sufficient stopping distance, the system decelerates the vehicle to a complete stop and switches on the electronic parking brake automatically.

When Emergency Assist is actively controlling the vehicle, the hazard warning lights are switched on and the vehicle performs a slight snaking motion within its lane to warn other road users. Ideally this will prevent a collision, or at least reduce its severity.

Emergency Assist cannot replace the driver's attentiveness. The driver is still legally responsible for the vehicle and must monitor the speed and distance in relation to other vehicles. Emergency Assist utilises both the Adaptive Cruise Control (ACC) and Lane Assist driver assistance systems. The ACC system should not be used on winding roads or in adverse weather conditions such as heavy rain. The system will not work if there are no recognisable lane markings. The camera vision can be reduced by rain, snow, heavy spray or oncoming lights. This and vehicles in front of you can lead to the lane markings not being recognised by the Lane Assist system.

Fatigue Detection

The driver Fatigue Detection system automatically analyses the driving characteristics and if they indicate possible fatigue, recommends that the driver takes a break. The system continually evaluates steering wheel movements along with other signals in the vehicle on motorways and other roads at speeds in excess of 60 km/h, and calculates a fatigue estimate. If fatigue is detected, the driver is warned by information in the Multi-function Display and an acoustic signal. The warning is repeated after 15 minutes if the driver has not taken a break.

Fatigue Detection cannot replace the driver's attentiveness. The driver is still legally responsible for the vehicle and therefore determining whether or not they are fit to drive. A driving time of 15 minutes is required in order to assess the driver correctly. The functionality of the system is restricted given a sporty driving style, winding roads and poor road surfaces.

Electronic Brake-pressure Distribution (EBD)

Electronic, more sophisticated means of regulating the ratio of front/rear brake pressure. Settings are varied according to driving and load conditions to ensure each wheel is braked to the optimum extent.

Electronic Stabilisation Program (ESP)

ABS and ASR traction control systems are integrated into the Electronic Stabilisation Program (ESP). In short, ESP helps ensure that the vehicle goes where you steer it even in extreme driving conditions. The ESP system constantly compares the actual movement of the vehicle with pre-determined values and should a situation arise where the vehicle starts to skid, ESP will apply the brakes to individual wheels and automatically adjust the engine's power output to correct the problem. ESP prevents the vehicle from losing control when trying to avoid an accident, for example. It also reduces the effects of understeer or oversteer.

Glossary

Extended Electronic Differential Lock (XDL)

XDL is an extension of the Electronic Differential Lock (EDL) function. When cornering, XDL responds to the load relief at the driven wheel/s on the inside of a corner. The ESP hydraulics are used for the XDL to apply pressure to the wheel on the inside of the corner in order to prevent wheel spin. This improves traction and reduces the tendency to understeer. As a direct result of the one-sided and precise braking pressure, cornering is sportier and more accurate.

Front Assist with Pedestrian Monitoring

The Front Assist is both a high and low speed AEB monitoring system which uses a radar sensor to detect critical distance situations and thus help to shorten the braking distance, reducing the risk of a rear-end collision.

The traffic ahead is monitored constantly by the radar at the front. If a vehicle is detected ahead of you in the lane, the distance and the speed relative to it are calculated. If the gap is closing too fast, Front Assist initially warns the driver by means of an audible as well as a visual signal. At the same time, the brake pads are brought into contact with the brake discs and the sensitivity of the Brake Assist is increased. This primes the braking system for a possible emergency stop. Furthermore, an automatic jolt of the brakes warns the driver of the danger. If the driver also fails to react to the warning jolt, Front Assist brakes automatically, helping to avoid a collision or reduce the severity of the accident.

At vehicle speeds below 30km/h, Front Assist monitors the area ahead of the car for vehicles which might present a threat of collision. If a collision is likely, Front Assist first pre-charges the brakes and makes the emergency Brake Assist system more sensitive: if the driver should notice the risk, the car is ready to respond more quickly to their braking action. However, if the driver still takes no action and a collision becomes imminent, City Emergency Braking independently applies the brakes very hard. If the driver intervenes to try to avoid the accident, either by accelerating hard or by steering, Front Assist will deactivate and allow the driver to complete the avoidance manoeuvre.

Pedestrian Monitoring is an extension of the Front Assist monitoring system. The system uses a camera to monitor the side of the road and a radar sensor in the radiator grille to monitor the area in front of the vehicle and within the limits of the system, register certain situations, for example a pedestrian stepping onto the road suddenly. Using the camera the system detects pedestrians on the side of the road and gives an immediate acoustic and visual signal to warn the driver of the possibility of danger. If the radar sensor then detects the pedestrian and the driver does not brake, the system initiates a jolt of the brake as a warning about the critical situation, while at the same time preparing for hard braking. If the driver fails to react, the system automatically performs emergency braking, within system limits. Ideally this will prevent a collision, or at least reduce its severity.

Front Assist with Pedestrian Monitoring cannot replace the driver's attentiveness. The driver is still legally responsible for the vehicle and must monitor the speed and distance in relation to other vehicles.

Lane Assist

Lane Assist is a lane departure warning system that is designed to help reduce the likelihood of the vehicle leaving the road or crossing into an oncoming lane and therefore the risk of accident as a result of driver distraction or a lapse in concentration.

The Lane Assist system monitors the road ahead with the aid of a camera (located near the interior rear-view mirror) which recognises lane markings and evaluates the position of the vehicle. If the vehicle starts to leave the lane, the Lane Assist system takes corrective steering action. If this is not sufficient the driver is warned about the situation by a steering vibration and is asked to take over the steering. Additionally, if no active steering movements by the driver are recognised for longer than approximately 8 seconds, a message will appear in the Digital Cockpit Pro in conjunction with a warning tone. The corrective steering function can be overridden by the driver at any time and the system does not react if the turn indicator is set before crossing a lane marking.

When adaptive lane guidance is active when using Travel Assist and the system detects both lane markings to the left and right of the vehicle, the function provides permanent assistance while the vehicle is in motion.

Lane Assist cannot replace the driver's attentiveness. The driver is still legally responsible for the vehicle and therefore staying in the lane at all times. The system will not work if there are no recognisable lane markings. The camera vision can be reduced by rain, snow, heavy spray or oncoming lights. This and vehicles in front of you can lead to the lane markings not being recognised by the Lane Assist system. The Lane Assist system does not activate at a vehicle speed of less than 65km/h.

Manoeuvre braking

Manoeuvre braking assists the driver to avoid or reduce damage in a potential collision by initiating emergency braking. It supports the driver during forward and reverse manoeuvring in a speed range of a maximum 10 km/h. If the risk for an accident is recognised, emergency braking is initiated to minimise possible damage.

Manoeuvre braking cannot replace the driver's attentiveness. The driver is still legally responsible for the vehicle. The object must be detected by the sensors. If the driver notices a risk that pedestrians, other vehicles or objects could be damaged they need to react accordingly and stop the vehicle.

Multi-collision brake

The multi-collision brake has been designed to provide effective assistance for the driver in the moments after an accident. Multi-collision brake triggers automatic controlled braking once an initial collision has been detected so as to reduce the intensity of further accidents after a collision and can help prevent follow-on collisions with oncoming traffic.

The triggering of the multi-collision brake is based on a collision being detected by the airbag sensors. The ESP control unit limits the deceleration of the vehicle by the multi-collision brake to a defined value and vehicle speed. The vehicle can still be controlled by the driver, even when automatic braking is taking place. The driver can interrupt the multi-collision braking at any time by accelerating or braking even more strongly.

Glossary

Park Assist

The third generation Park Assist system actively helps the driver when entering or reversing into 90° parking bays, as well as reversing into and driving out of parallel parking spaces. The system works by using sensors mounted either side of the front and rear bumpers together with parking distance sensors front and rear.

To park, the driver simply presses the Park Assist button to select the type of parking manoeuvre and uses the appropriate indicator as the car slowly passes the potential parking space. Sensors scan the size of the parking space as the car is driven past and the driver is alerted if the parking space is big enough. If there is sufficient space, the driver stops the car, selects the correct gear and lets go of the steering wheel.

Park Assist will alert the driver of the intended path and subsequently the appearance of obstacles in the Digital Cockpit Pro, within the driver's field of vision. Park Assist then actively supports the driver by taking over the steering control and parks the vehicle in the available space using the ideal course, if necessary with several moves. The driver can however take over the control of the steering at any time and end the automatic parking procedure.

Park Assist cannot replace the driver's attentiveness. The driver is still legally responsible for the vehicle. If the driver notices a risk that pedestrians, other vehicles or objects could be damaged or if they are uncertain of the risk, they will need to react accordingly and stop the vehicle, ending the function.

Travel Assist

Travel Assist is an assistance system for partly automated driving. At the push of a button, Travel Assist can support the driver in monotonous and tiring driving situations commonly encountered on long motorway journeys. This system combines the functions of Adaptive Cruise Control (ACC), Lane Assist with adaptive lane guidance to accelerate, brake and maintain the vehicles position within its lane. The capacitive steering wheel can detect whether the driver's hands are on the steering wheel in readiness to steer the vehicle and will issue a visual and audible warning when not detected.

Travel Assist cannot replace the driver's attentiveness. The driver is still legally responsible for the vehicle and must monitor the speed and distance in relation to other vehicles. Travel Assist has been developed for use only on motorways. The ACC system should not be used on winding roads or in adverse weather conditions such as heavy rain. The system will not work if there are no recognisable lane markings. The camera vision can be reduced by rain, snow, heavy spray or oncoming lights. This and vehicles in front of you can lead to the lane markings not being recognised by the Lane Assist system.
