We've Been Making 4x4s For Over 70 Years

- PikUp has been in Australia for 15 years and its 4x4 DNA stems from a vehicle heritage that stretches back over 70 years, that is the core of the PikUp 4x4 Ute.
- Features like high and low range dedicated transfer case along with mechanical locking rear differential and benchmark approach angle make PikUp truly capable off-road

NEW AUTOMATIC
PIK-UP

TESTED FOR OVER **50,000** **KILOMETRES** IN AUSTRALIA

The NEW Automatic Mahindra PikUp has completed over 50,000km of testing in Australia from hot Red Centre testing in the NT, through to Victorian High Country Snow testing, towing, off-road and city driving conditions to add further confidence to the durability in Australian Real-World Conditions.

PERFECT FOR YOUR FAMILY

- Pik-Up comfortably takes both city and tough off-road tracks in its stride with its benchmark 34-degree approach angle 103 kW, 2.2 Litre common rail intercooled turbo diesel engine produces a peak torque of 320 Nm.
- With Bosch Engine Management system, the mHawk engine provides proven reliability and unrivalled fuel efficiency.
- The engine valve train is driven by twin timing chain system, so no expensive belts to replace under maintenance.
- The 6-speed Aisin Automatic Transmission adds to the driving pleasure both on city roads and tough off-road tracks.

New features like Faux Leather Steering Wheel, Large Footrest, 6 Speed Aisin Automatic (S11) combined with Comfortable front row seating with arm rests make long drives a pleasure.

Driver Information System

Apple Car Play / Android Auto

Mahindra Advantage

- Mahindra has been making Euro 6 engines for the European market since 2014.
- Using our SCR, DPF and DEF (Adblue®) Dosing technologies along with our state-of-the-art Bosch Fuel Injection systems our new 2.2 mHAWK diesel engine used on S11 AT meets Euro 6b emission standards.
- With Introduction of NEW Euro 6 Engine on Dual Cab PikUp sees the introduction of our New Factory Vehicle Warranty of 5 Year/150,000km on all Euro 6 vehicles* (S11 AT DC PIKUP) that brings in additional peace of mind

What are the benefits of moving to New EURO 6 Emission norms?

A 70% reduction in harmful Nitrogen Oxides (NOx) tailpipe emissions, making the Mahindra PikUp one of only very few options customers have in the Australian market to drive a Euro 6 compliant Dual Cab Ute.

| Fuel | Pollutant Gases | EURO 5 MT | EURO 6 AT |
|--------|----------------------|-------------|-------------|
| Diesel | HC + NOx | 245.3 mg/km | 97.90 mg/km |
| | Particulate Matter | 2.23 mg/km | 0.3 mg/km |
| | Nitrogen Oxide (NOx) | 201.6 mg/km | 61.60 mg/km |

#needs regular top up of DEF (ADBlue) at maintenance service. Emission regulation mandates prevention of engine starting/ running if ADBLue runs out completely. For further details, please refer ownership section on our website.

Frequently Asked Questions on ADBLue®

Technology has become so advanced the Euro 6 standard requires diesel engines to emit less than 80mg/km of Nox.

| Question | Answers |
|--|---|
| What is Service Schedule of S11 PikUp? | 15,000 km / 12 months <i>(Whichever earlier)</i> |
| What is Adblue® Usage per Vehicle? | Varies based on type of Driving Conditions, Driver Style etc |
| Is there a Warning/Alert if Low Adblue®? | Yes at 2400km, then again at 800km, then again at Last Ignition key cycle before non-start# |

For further details please refer the FAQ section under ownership on our website
