## Safety at heart

The Nissan X-TRAIL is equipped with advanced Nissan Intelligent Mobility technologies that combine to help you see more, sense more and can even step in to respond to potential hazards.

ProPILOT<sup>△</sup> allows you to enjoy your highway commute by automatically keeping up with traffic flow and helping keep you centred in your lane through a combination of automated steering, acceleration and braking. This intelligent safety technology helps ease driver workload in highway traffic and long commutes at the push of a button.

Intelligent Around View<sup>®</sup> Monitor with Moving Object Detection<sup>\*^</sup> provides all-round reassurance from a 360 degree view of your car with four cameras mounted around the vehicle to provide front, rear and kerbside views.

#### INTELLIGENT FORWARD COLLISION WARNING<sup>^</sup> Keeps an eye on up to two vehicles ahead of X-TRAIL. If the system detects sudden deceleration ahead, it will give you audible and visual warnings to respond and slow down.

#### INTELLIGENT EMERGENCY BRAKING<sup>^</sup>

By monitoring speed and distance between X-TRAIL and the vehicle ahead, Intelligent Emergency Braking<sup>6</sup> can automatically engage the brakes to help avoid a frontal collision or lessen the severity of an impact. And when it detects a pedestrian at the crosswalk, it can stop you in your tracks. The technology also features cyclist and junction detection for added piece of mind.

#### INTELLIGENT REAR AUTOMATIC BRAKING<sup>^</sup>

Helps you back-up with confidence by watching behind you during reversing manoeuvres. If a large stationary object is detected behind your vehicle, the system can automatically engage the brakes to help avoid a rear collision or lessen the severity of an impact.

#### INTELLIGENT CRUISE CONTROL<sup>^</sup>

Keeps a set distance between X-TRAIL and the vehicle ahead by measuring space and controlling acceleration and deceleration to automatically maintain a suitable following distance within your set speed.

#### INTELLIGENT LANE INTERVENTION<sup>^</sup>

Avoid unintentional lane departure. When lane markings are clear, Intelligent Lane Intervention<sup>°</sup> can keep you centred in your lane and can tap the brakes to help gently guide you back

#### \* Not available on ST

<sup>a</sup> ProPILOT cannot prevent collisions. It is the driver's responsibility to be in control of the vehicle at all times. Always monitor traffic conditions and keep both hands on the steering wheel. System operates only when lane markings are detected. Does not function in all weather, traffic and road conditions. System has limited control capability and the driver may need to steer, brake or accelerate at any time to maintain safety. See Owner's Manual for safety information. Not available on ST.

^ Driver's aid(s) only, not a substitute for safe driving. Always monitor your surroundings.
