

Innovation  
that excites

# NISSAN 370Z

# HISTORY

In the late 1960s, Yutaka Katayama, President of Nissan recognised the need for an affordable sports car and encouraged the creation of the Datsun 240Z. With its launch in 1969, a true automotive dynasty had begun. The Z continued to develop through the 1970s with the 260Z and 280Z both being met with adulation for their engineering and contemporary design.

In 1984 the Z was redesigned from the ground up, this produced the 300ZX which was the first Z to be known as a Nissan. 2002 marked the next major milestone for the Z series, with the launch of the multiple award winning Nissan 350Z. The latest Nissan 370Z draws upon this rich heritage, while unashamedly being a car of today. An opportunity for everyone to experience the true joy of sports car driving.

# PASSION WITHOUT A REDLINE

The Nissan 370Z Coupe has been passionately designed and engineered to provide an extraordinary driving experience for the sports car enthusiast. The Nissan 370Z features an aggressive front bumper and grille, stylish LED daytime running lights and 19" forged alloy wheels by RAYS® framing the bold red brake calipers. As you will discover the Nissan 370Z delivers the ultimate expression of the Nissan philosophy: Innovation that excites.

## TRANSMISSION

The Nissan 370Z gives you a choice of either a 6-speed close-ratio manual or a 7-speed automatic transmission with Manual Mode (M-Mode). SynchroRev Match technology for manual transmission automatically controls and adjusts engine speed when changing gears, allowing you to focus more on braking and steering, whilst improving the vehicle's balance and smoothness. Naturally, for manual drivers who prefer less vehicle intervention, the system can be deactivated.

The 7-speed automatic also offers the benefit of Downshift Rev Matching to smooth out gear changes. By selecting M-Mode, you can take full control and drive the car like a manual. No matter which transmission style you choose, you will enjoy razor-sharp responsiveness.

## HANDLING

The Nissan 370Z is built on a platform that enhances handling, ride comfort and overall safety while reducing vibration and harshness. The double wishbone aluminium-alloy multi-link front suspension and independent multi-link aluminium-alloy rear suspension will have you gliding effortlessly around curves. As you apply pressure to the accelerator coming out of a corner, the Viscous Limited Slip Differential will ensure the rear wheels use the power wisely and the Nissan Sports Braking System to help keep you in total control. Meanwhile, the speed-sensitive hydraulic power steering alters the feel of the steering dependent upon your speed. All elements of design, construction and technology work in harmony to deliver an extraordinary driving experience.

## INTERIOR AND TECH

The stylish leather-accented<sup>^</sup> sports seats are designed to hold you snugly as you take the curves. The touchscreen satellite navigation system makes getting to your destination easy. Active Noise Cancellation and Active Sound Enhancement on the Coupe models removes unwanted noise, allowing for the Bose® audio system to provide you a clean, rich sound. From the moment you get in, you can tell – the 370Z interior has been custom-tailored to give you the drive of your life.

<sup>^</sup>Leather accented features and upholstery may contain synthetic material.

# INNOVATION THAT LOOKS OUT FOR YOU

## MONITOR

Smart technologies that are designed to help monitor conditions. Like a standard rear view camera with Predictive Path Technology that helps you notice what's directly behind the vehicle - or what you might have missed - for added peace of mind.

## RESPOND

Whether you need to hit the brakes hard or manoeuvre around an unexpected obstacle, these standard technologies help you respond to a potentially harmful situation.

- **Vehicle Dynamic Control** helps you maintain your steered path.
- **Traction Control System** helps reduce wheel spin in low-traction situations.
- **Anti-lock Braking System** helps you maintain steering control around obstacles under heavy braking, while preventing the brakes from locking.
- **Electronic Brake force Distribution** sends extra force to the rear brakes when you have additional weight of a passenger or cargo in the back.
- **Brake Assist** helps apply maximum braking force if it detects hard braking and senses you are in an emergency situation.

## PROTECT

When a collision is unavoidable, the Nissan Zone Body construction helps absorb the impact while the advanced seat belt and airbag systems help protect all occupants.

Nissan Advanced Airbag System comes with dual-stage supplemental front airbags with seat belt and occupant-classification sensors. Dual front, dual side and dual curtain SRS airbags will protect the driver and passenger in the case of a front or side impact.

**6 STANDARD AIRBAGS**

## NISSAN INTELLIGENT MOBILITY

Nissan Intelligent Mobility guides everything we do. At Nissan, we use new technologies to transform cars from mere transportation. Together the journey is more confident, connected, and exciting. Whether it is cars that share the task of driving or highways that charge your EV as you go along, it's all in the very near future. And it's a future already taking shape in the Nissan you drive today.
